LETTER OF INTENT

Zoning Board of Appeals
DeKalb County, Georgia

RE: Variance Requests
2695 Midway Road
Decatur, GA 30030

Dear Members of the Zoning Board of Appeals:

We are respectfully requesting two variances for an addition to the existing garage. We are adding an Accessory Dwelling Unit above the garage and turning the garage into a carport. A corner of the existing garage is 2.7' within the required 7.5' side yard setback. The existing lot coverage of 38.7% is over the required 35%. We are proposing to remove part of the concrete driveway and replace it with permeable pavers to reduce the lot coverage below the existing 38.7%.

Both variance requests are from Section 27-2.2.1:

- 1) Side yard setback reduction from 7.5' to 2.7'
- 2) Lot coverage variance to increase from 35% to 36.51% (currently 38.7%)

1. There is an extraordinary or exceptional physical condition(s) pertaining to the particular piece of property (such as, but not limited to, lot size, lot shape, specimen tree(s), steep slope(s), or preservation of historic characteristics of the property), which was not created by the current owner, previous owner, or applicant; by reason of a clearly demonstrable condition(s), the strict application of the requirements of this chapter would deprive the property owner of rights and privileges enjoyed by other property owners in the same zoning district, as distinguished from a special privilege or convenience sought by the property owner.

The corner lot status creates limiting setbacks on the west side of the property so the location of the proposed structure is on the east side. This location also does not interfere with an existing 48" hardwood on the west side of backyard.

2. The requested variance does not go beyond the minimum necessary to afford relief and does not constitute a grant of special privilege inconsistent with the limitations upon other properties in the zoning district in which the subject property is located.

The proposed Accessory Dwelling Unit is 687.23 SF and is only the minimum size necessary for providing for the owners' daughter with special needs who will not be able to live independently. The maximum allowed for an ADU is 900 SF and this is well under that requirement.

3. The grant of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the zoning district in which the subject property is located.

The proposed ADU will not harm the public welfare, neighboring properties, or any improvements in the same zoning district. The adjoining neighbors to the east and to the south of the property have approved of the proposed project and have signed letters of support which are attached.

Also attached are pictures of the main house to show the owners' improvement of the area and the existing garage. The proposed ADU will maintain the character of the existing house.

4. The literal interpretation and strict application of the applicable provisions or requirements of this chapter would cause undue and unnecessary hardship.

The enforcement of the side yard setback and lot coverage would restrict the intended project and would not allow the owners to effectively use their property.

5. The requested variance would be consistent with the spirit and purpose of this chapter and the DeKalb County Comprehensive Plan text.

The intent of the Suburban Character Area is to recognize those areas of the county that have developed in traditional suburban land use patterns while encouraging new development to have increased connectivity and accessibility. These areas include those developed (built out) and those under development pressures. These areas are characterized by low pedestrian orientation, limited transit access, scattered civic buildings and curvilinear street patterns. Future development should provide better pedestrian and community connectivity and be designed in a way that preserves and enhances existing greenspace. The proposed density for areas of this type is up to 8 dwelling units per acre.

re: Proposed new carriage house above garage for 2695 Midway Road

Dear Neighbor,

We are in the process of designing a new carriage house above our existing garage. Our existing garage will become a carport with a guest house above. The project includes a slightly larger footprint of 4.5' to the west of the garage and 6.0' to the south. This will allow enough space for a one bedroom guest house.

The existing garage is within the side yard setback and at an angle to the east property line. At the closest point the garage is 2.7' to the property line and we are requesting a reduction from 7.5' to 2.7' to maintain that existing corner of the garage. The rear yard setback for an Accessory Dwelling Unit (as Dekalb County calls it) is 10' and we will maintain that setback.

Our existing lot coverage is over the required 35% and we are proposing to replace part of our concrete driveway in the backyard with permeable pavers. This will reduce the overall coverage to about 36.6%. While this is a reduction in lot coverage, we are still required to obtain a variance requesting the 36.6%

We are enclosing a site plan showing the intended changes and a floor plan with elevations. The height of the carriage house will be within the required 24' height and the style and materials will be similar to our existing house.

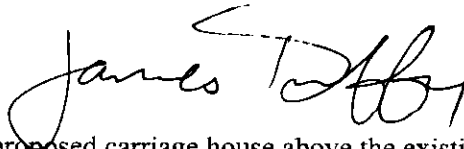

Once you have reviewed the information, we would appreciate you signing and returning this letter as a show of support.

Please feel free to contact us or our architect (Mary Turnipseed 404-310-4685 mary@maryturnipseed.com) if you have any questions or concerns about our project.

Sincerely,

Dan & Sue

Signature of Approval

I have no objection to the proposed carriage house above the existing garage at 2695 Midway Road.
