Community Meeting Letter (signed).pdf;

First let me introduce myself, my name is Brian Hercules. I represent SRM Concrete, and we are very interested in investing in your community and becoming a community partner. We have a contract on two parcels of land located at 3298 and 3272 Fayetteville Rd. We are requesting to rezone 3298 from M to M2, this zoning will match the current zoning on 3272 Fayetteville Road.

Our intent will be to build a Ready-Mix Batch plant on the site to provide concrete to the area. We supply large and small projects. Everything from new industry to the DIY project on Saturday morning. We will invest close to \$15 to \$18 million dollars in the plant and employee 15 employees on the start-up. Our employees will earn between \$75,000 to \$100,000 with full benefits. We will also invest close to \$7 million in equipment of trucks and loaders etc.

We are excited to start the process by having a meeting with the community. Attached is an invite for each of you to come and learn more about SRM Concrete and our plans for the property referenced in the first paragraph ( we are mailing the invite to all property owners within 500 feet of the property as well). I look forward to the opportunity to meet each of you and extend a welcome to any questions you may have about SRM or the project we are working on. Below is my email as well as my cell number . Please email or call me with any questions.

Brian D. Hercules | Land Development | Smyrna Ready Mix Concrete, LLC. 1000 Hollingshead Circle Murfreesboro, TN 37129 | C: (615) 624-1221 brian.hercules@smyrnareadymix.com

#### September 18, 2024

Re:

NOTICE OF COMMUNITY MEETING

Rezoning Application for 3272 Fayetteville SE St, Atlanta, GA 30316

To Whom It May Concern:

We would like for you to join us for a community meeting to discuss a proposed Application for Rezoning for the above referenced property from an M to an M-2 classification. The purpose of this meeting is to provide you with information regarding this project and to give you an opportunity to ask questions and voice your opinion. The meeting details are as follows:

Date: October 10, 2024

**Time:** 5:30pm

Location: Church of Christ at Bouldercrest

2727 Bouldercrest Road, Atlanta, GA 30316

If you have any questions about the meeting, please contact Brian Hercules at 615-355-1028 or brian.hercules@smyrnareadymix.com.

Sincerely,

Hollingshead Materials, LLC,

a subsidiary of Smyrna Ready Mix Concrete, LLC

J.D. Kious,

General Counsel

JDK/kn

Brian D. Hercules 1000 Hollingshead Circle Murfreesboro, TN 37129 (615) 624-1221

RE: Zoning Application and SLUP Application

The property is at 3298 Fayetteville Rd. Atlanta, GA 30016. The property is part of two parcels zoned mix use, M light Industrial and M-2 Heavy Industrial. We are requesting that the zoning be unified so that the land may be used for a concrete ready-mix facility. We are also asking for a SLUP approval for our Concrete Batch Plant. There is currently a sale agreement in place between the previous owner and Smyrna Ready Mix, which is contingent on zoning and permit approval. Thus far, SRM has received overwhelming support with the plans to develop this property and become part of the local community. We hope that we receive the same support with consideration in rezoning so that we can move forward to the site permitting process. We would be pleased to promptly respond to any concerns or reservations to our request.

Respectfully,

Brian D. Hercules Land Acquisitions

Attachment
Facility Description

#### Summary

Smyrna Ready Mix Concrete, LLC (SRM) will invest over \$16,000,000 in the greenfield and plant development of a concrete plant in Atlanta, GA. In addition to the construction budget spent in the local economy, 15 to 20 full-time employees will be staffing the operations with competitive wages, best in industry health insurance offerings, and retirement plans that are immediately vested. SRM is committed to a design that will control access and truck traffic. The plant will have a plant manager, batcher, loader operator and mixer operators when we are fully commissioned. As a family-owned business, we are acutely aware of the needs of the community. The Hollingshead Foundation is committed to giving back to the local community. Our concrete plant is designed by Stephens Manufacturing and implements the latest technology available to control dust and noise. SRM has performed noise studies in various markets, and all were following OSHA standards for noise levels.

#### **Existing/Current Property Description**

Located at 3298 & 3272 Fayetteville Rd SE, the existing site is fenced with access located at the corner of Fleetwood Dr SE and Fayetteville Rd SE. The property is currently undeveloped, ungraded, unkept trees and shrubs; the site is being used for storage of vehicles and trailers on the accessible areas of the site. The current zone is M and M-1.

#### Site Improvements

The upper area of the site will require extensive grubbing and clearing, keeping all trees and shrubs, and replacing others where required. The property will require grading on the upper portion of the parcels to allow for proper drainage, paving and construction of facility. Portions of the lower elevations of the parcels will support drainage and retention/detention, to be determined. The site fencing, gates and signage will be improved by SRM to meet current local ordinances. The facility will mostly be paved concrete with wastewater and storm water retention/drainage that facilitates operations and surrounds the property. The main component to the facility is a small two-story operations/office building, Stephen's Plant Batching equipment (hopper, conveyors, aggregate bin, loading hopper), designated area for material stockpiles (material isolated by concrete block walls), and allocated space for labor and truck parking. Final site configuration will be determined after review of easement, access, and other requirements necessary to meet compliance with city/county/environmental regulations.

#### Waste Water Handling

We will collect the wastewater on site and recycle onsite to be used for washdown and wet down of aggregates. Wastewater from this type of operation sediment from aggregates and cement powder; these sediments are removed using a settling containment system; as needed, the sediment containment bays are dredged with frontend loader for removal or reuse of material.

#### **Operations Description**

Startup - The plant operations will begin every morning at 7 am (time TBD based on local ordinance restrictions) a daily checklist which includes things like equipment inspections, material levels/testing, consumables, safety checks. Operators/Drivers will all receive daily schedule and safety briefs, followed by inspections of equipment.

Loading/Mixer Truck Operations - As per schedule needs, drivers will line up and load the mixers under the batch hopper. Following loading, drivers will advance their trucks through a truck wash and rinse area, and there they will do a slump check and rinse off any dust or debris remaining on the truck before exiting the site. SRM is committed to controlling dust, keeping the plant and its streets clean and free from debris. When returning to the site, If the mixer truck requires cleanout, it will use Type 1 wastewater containment, followed by either returning to the hopper to reload or shutdown/park on the northeast side of the property.

Front End Loader Operations - A loader will be used for handling the material piles and for loading the batch plant's feed hopper. Material stockpiles will be located on the East portion of the site, minimizing interference from other operational traffic. The loader will also from time- to-time be scrapping out the wastewater systems settlement cells. Sediment will go to a waste pile removed from the site for recycling.

End of Day – All equipment will be parked and checked. All facility equipment will be secured/locked up after 5pm. Minimal lights will stay on at night for security reasons.

#### Site Access

SRM will apply for an access permit, final access TBD but tentatively will be offset to the east of the Fleetwood/Fayetteville intersection.

#### Facility operations traffic

The facility intends to operate 10-12 trucks from the site. Each mixer truck will make 4-10 trips per day. Additionally, there will be 2-4 material deliveries per day of aggregate and cement. We estimated that the site will not exceed a total of one hundred trips per operation day.

Employee and visitor parking- Required parking will be provided for the office building. Additional space for employee parking is available along the south edge of the paved perimeter.

#### Other Facility Facts

- 15 to 20 full time employees
- Standard Vehicles on site: 12-14 POVs, 10 to 15 mixer trucks, one front-end loader
- Standard hours of operations 7 am-5 pm
- City water (Estimated consumption of 10,000gallons per day)
- City Sewer (less than 500gallons)

- Dust control Equipment configured with dust control system, wet down water will be used for aggregate piles.
- Lighting control Limited site lighting will be used in the early hours or later afternoon. Overnight lighting will be limited to a few flood lights used for security purposes.

#### Parking Requirement (per Section 6.1.4)

Parking Formula for proposed use as a Concrete Manufacturer.

Minimum Parking Spaces Required – One (1) space for each two
Parking Formula thousand (2,000) square feet of floor area.

Maximum Parking Spaces Allowed – One (1) space for each one thousand three hundred (1,300) square feet of floor area.

Required Spaces N/A (Vacant Lot)
Provided Spaces 0

Is Parking Compliant? Yes

#### 4 - Conformance Detail

# Is the use of the property as a Vacant Lot permitted in the M Light Industrial and M-2 Heavy Industrial Districts?

Yes, the current use as a vacant lot is permitted in both M Light Industrial and M-2 Heavy Industrial Districts.

<u>Note:</u> The proposed use as a Concrete Manufacturer is not permitted by right in the M Light Industrial District. The proposed use as a Concrete Manufacturer is permitted by right in the M-2 Heavy Industrial District.

#### Are there any non-conformities related to bulk restrictions?

None.

#### Was the property established legally?

Yes, the jurisdiction acknowledges this site exists and did not question the legal establishment of the site.

Does this site have any special overlays, permits, and/or conditions?

None.

#### **Casualty Statement**

Sec. 8.1.15 – Reconstruction of damaged or destroyed nonconforming structures.

A legal nonconforming building or structure that has been damaged by fire, flood, or other natural cause to an extent that the estimated cost of reconstruction does not exceed sixty (60) percent of its fair market value according to the Dekalb County Tax Assessor's valuation for the tax year in which the damage occurred, as determined by the director of planning, may be reconstructed and used as it was prior to being damaged if a complete permit application is submitted for said re-construction within two (2) years of the date of the damage and the work progresses continuously upon issuance of the permit therefor. If said building or structure has been determined by the director of planning to have been damaged to an extent that the estimated cost of reconstruction exceeds sixty (60) percent of its fair market value according to the Dekalb County Tax Assessor's valuation for the tax year in which the damage occurred, then any repair, reconstruction or new construction shall conform to the then existing requirements of the zoning district in which said building or structure is located.

This site can be rebuilt to its current physical state and use in the event of damage or destruction due to its legal conforming status based on the zoning restrictions we list and evaluate in this report.

In the even that the physical characteristics of this site change and/or the zoning ordinance changes in the future resulting in the site becoming legal nonconforming, rebuild-ability will be dictated by the section of ordinance we list at the beginning of this Casualty Statement section. For the full section on non-conformities please see the jurisdictions website at:

https://library.municode.com/ga/dekalb\_county/codes/code\_of\_ordinances?nodeId=CODECO\_CH27ZO

#### **Jurisdiction's Definition of Legal Non-Conforming**

Legal nonconforming lot – A lot of record that at the effective date of this zoning ordinance does not conform to the applicable minimum road frontage requirement, minimum lot area, or lot width requirements for the zoning district in which it is located may still be used as a building site provided that the height, buffer, setback, and other dimensional requirements of the zoning district in which the lot of record is located area complied with, or a variance therefrom is obtained.

Nonconforming use – A legal use in existence on the effective date of this zoning ordinance or any amendment thereto may be continued even though such use does not conform with the use provisions of the zoning district in which said use is located, except as otherwise provided in this section.

Nonconforming structures – A legal structure in existence on the effective date of this zoning ordinance or any amendment thereto that could not presently be built under the provisions of this chapter because of restrictions on building area, lot coverage, height, minimum yard setbacks, or other characteristics of the structure or its location on the lot shall be deemed a legal nonconforming structure subject to this article 8.

#### 5 - Additional Comments

None.

#### 6 - Reliance Language

None Required by Client

#### 7 - Disclaimer

The above report is based upon the information that Realm Land Services was able to obtain from the local jurisdiction and surveyor. Our professional opinion is limited to the scope of zoning information we present in the above report. Our opinion does not replace that of a zoning attorney or the local jurisdiction. We do not recommend changes be made to this site based on our zoning report without first contacting the local jurisdiction as our opinion may vary from theirs.

1 For existing O-I zoned properties in activity centers, existing, high-rise structures that have been vacant for longer than three years may be adaptively reused for residential development with a minimum dwelling unit size of no less than 400 square feet.

- \* If located next to single-family residential and the building will exceed 35 feet, the building setback from SF residential shall be increased 50%.
- \*\* Fire department and rescue services must approve over 3 stories to assure adequacy of fire protection facilities.

\*\*\* 5 story/70 feet if in an activity node, 2 story/35 feet outside an activity node, unless obtaining a SLUP for up to 5 story/70 feet.

(Ord. No. 15-06, 8-25-2015; Ord. No. 2022-2542, Pt. I, 1-26-2023)

#### 27-5.4 DIVISION 4. - STREETSCAPE AND LANDSCAPING REQUIREMENTS

#### Sec. 5.4.1. - Purpose and intent.

The requirements and regulations for landscaping in DeKalb County are a critical public concern that are necessary in order to preserve and enhance property values, the aesthetic beauty of the county, and the safety and general welfare of its residents. The intent of landscape regulations is to:

- A. Provide buffering between non-compatible land uses.
- B. Protect, preserve, and promote aesthetic appeal and scenic beauty.
- C. Reduce noise pollution and air pollution.
- D. Reduce stormwater run-off, erosion and degradation of water quality.
- E. Filter and reduce glare from artificial light sources.
- F. Provide shaded areas along streets and in parking areas.
- G. Reduce solar heat islands.

(Ord. No. 15-06, 8-25-2015)

#### Sec. 5.4.2. - Applicability.

- A. New developments, principal building or use. The requirements and regulations for streetscape and landscaping apply to principal buildings, new developments or open uses of land constructed or established after the effective date of this zoning ordinance.
- B. Change of use, expansions or reconstruction. Where a change of use, expansion to, or reconstruction of an existing building or site improvement(s) (such as parking lots) impact streetscape and/or landscape improvements, the landscaping requirements shall apply only to the area disturbed in the development process.
- C. *Publicly owned buildings.* To the extent allowed by law, the requirements and regulations for streetscape and landscaping apply to improvements to land owned by public agencies except utility rights-of way or easements.

about:blank 1/24

(Ord. No. 15-06, 8-25-2015)

Sec. 5.4.3. - Streetscape elements and dimensions.

All development shall comply with the streetscape element requirements described below and in Table 5.1. Topping of canopy trees within this section is prohibited.

#### A. Streetscape dimensions and placement.

#### 1. New streets.

- a. *Applicability.* New streets shall be constructed with continuous streetscape zones on both sides of the street, beginning from back of curb.
- b. *Streetscape zone elements for new streets.* The streetscape zone on new streets shall consist of a landscape strip, a sidewalk, and, when required per Table 5.1, a supplemental zone.
- c. *Sidewalks*. Sidewalks shall be provided between the landscape strip and the supplemental zone, as required in Table 5.1 and the figures following the table.
- d. Landscape strips.
  - i. Landscape strips shall be located between the curb and the sidewalk.
  - ii. Landscape strips shall be designed with street trees and pedestrian scale streetlights as required in Table 5.1 and the figures following the table.
  - iii. See subsection C. for planting and materials requirements.
  - iv. Large scale retail has additional landscape standards adjacent to streets as provided in section 5.7.8.
- e. *Supplemental zone*. New streetscape zones in non-residential areas shall provide a supplemental zone outside the right-of-way on a private easement. Private easement agreements shall be submitted to the director of planning. See subsection D.
- (2) Improvements on existing streets.
  - a. *Applicability.* New development and redevelopment occurring on existing streets shall provide a streetscape zone on the side of the street where the development takes its access.
  - b. Streetscape zone elements for existing streets.

- i. The streetscape zone for existing streets shall consist of a minimum of eleven (11) feet along the existing shoulder, as indicated in Table 5.1.
- ii. The streetscape zone for existing streets shall consist of a landscape strip and a sidewalk, as shown in Table 5.1 and the figures following the table.
- c. Sidewalk and landscape strip dimensions. The width and location of sidewalks and landscape strips shall be determined by the director of public works based on GDOT standards, if applicable, and compatibility with existing sidewalks and utilities.
- d. *Landscape strips.* 
  - i. Landscape strips shall be located between the curb and sidewalk, and/or between the sidewalk and the property line.

    The required total width of the landscape strip may be distributed on either side of the sidewalk so as to accommodate existing infrastructure.
  - ii. Landscape strips shall be designed with street trees and pedestrian scale streetlights as shown in Table 5.1 and the figures following the table.
  - iii. See subsection C. for planting and materials requirements.
  - iv. Large-scale retail has additional landscape standards as provided in section 5.7.8.
- e. *Programmed road improvement projects.* If DeKalb County or GDOT has a programmed road improvement project along the frontage to be developed, then the streetscape shall be constructed consistent with the design standards for such road improvements plans.
- f. *Administrative variance*. The director of planning shall have the power to grant administrative variances for streetscape requirements on existing streets upon written request by the property owner and compliance with <u>article 7</u> based on a finding that the requirement of the subsection A.2. would have a significant adverse effect on the historic pattern or cannot be met due to circumstances beyond the control of the applicant, including, but not limited to:
  - i. Inadequate right-of-way;
  - ii. Conflicting standards between this section and GDOT design standards;
  - iii. Unique topographic or subsurface conditions;
  - iv. Need to relocate existing utilities.
- B. Sidewalks and interior walks.

about:blank

- 1. Sidewalks shall be paved in concrete and paver accents approved by the director of planning and kept clear and unobstructed for the safe and convenient use of pedestrians.
- 2. Sidewalks shall adhere to ADA guidelines.
- 3. Sidewalks shall be continued across intervening driveways by continuation of the sidewalk paving materials or other methods of differentiation.
- 4. Where newly constructed sidewalks abut existing sidewalk(s), the newly constructed sidewalk shall provide safe transition of pedestrian traffic flow to the adjacent sidewalk(s). Development that disturbs existing sidewalks on another property shall replace disturbed areas to their pre-disturbance state and condition.
- 5. For uses other than single-family residential, safe and convenient paved pedestrian pathways shall be provided from sidewalks along streets to each building entrance, including pedestrian access routes to parking decks and through parking lots and between adjacent buildings, transit stops, street crossings within the same development. All such pathways shall have a minimum width of three (3) feet.

#### C. Landscape strip materials and maintenance.

- 1. *Required mix of materials.* Landscape strips in the streetscape zone shall be planted with a variety of deciduous, over story and understory trees. Species of shrubs, flowering plants, grass and other ground covers, which are well adapted to the local climate, may be included in the landscape strip.
- 2. *Sidewalks*. Sidewalks shall be paved in concrete and paver accents approved by the director of planning and kept clear and unobstructed for the safe and convenient use of pedestrians.
- 3. *Pedestrian crossing.* Landscape strips may include brick, concrete, or granite pavers where on-street parking is provided or regular pedestrian crossing of the landscape strip is reasonably anticipated to occur.
- 4. *Maintenance*. Required landscape strips shall be established and maintained by the owner(s). Topping of canopy trees is prohibited.
- 5. *Permanent structures*. Permanent structures such as buildings, driveways that are not perpendicular to the landscape strip, parking spaces, dumpsters, drainage structures and detention facilities shall be prohibited in required landscape strips. The prohibition of this subsection shall not include crossings perpendicular to the strip, necessary retaining walls four (4) feet or lower, bike racks, benches, trash receptacles, signs, mailboxes, and drainage swales.

#### 6. Planting specifications, all trees.

- a. Planting areas for trees shall contain a minimum depth of twelve (12) inches of screened topsoil. Below twelve (12) inches the soil shall be un-compacted to a depth sufficient to allow proper drainage and root growth.
- b. Use of root barriers such as U.B.36 or an equivalent is required at the back of the sidewalk or back of the curb if no sidewalk exists.
- c. Trees shall meet the standard for American Nursery Stock ANSI Z60.1.

#### 7. Street trees.

- a. Street trees shall be overstory trees unless site constraints prohibit the use of large maturing trees, subject to the approval of the director of planning.
- b. Street trees shall be provided with spacing as depicted in Table 5.1.
- c. Street trees shall not be planted closer than twenty (20) feet from the curb line of intersecting streets and not closer than ten (10) feet from intersecting lines of alleys or private drives.
- d. Street trees shall not be planted closer than twelve (12) feet from light standards. No new light standard location shall be positioned closer than ten (10) feet to any existing street tree.
- e. Street trees shall not be planted closer than two and one-half (2.5) feet from the back of the curb.
- f. Where there are overhead power lines, street tree species are to be chosen from a list provided by the county arborist that will not interfere with those lines.
- g. Street trees, as they grow, shall be pruned to provide at least eight (8) feet of clearance above sidewalks and twelve (12) feet above driveways and roadway surfaces.
- h. Street trees shall be a minimum of two-inch caliper measured at six (6) feet above ground level at the time of planting and shall have a mature height of at least twenty-five (25) feet.
- i. Street trees shall be planted in a mulched area of at least twenty-five (25) square feet.

#### D. Supplemental zone.

- 1. In supplemental zones in commercial areas where building setbacks are fifteen (15) feet or less, the supplemental zone must contain hardscape and street furniture such as trash receptacles, bike racks, and benches.
- 2. For additional requirements for supplemental zones abutting parking lots, see section 5.4.4.

- E. [Street lighting.] Street lighting shall be accomplished with pedestrian scale lighting and street lights. Street lights shall be placed on property lot lines abutting the street. Lighting plans must be approved by the department of public works. Lighting shall be installed by local power company employees or contractors.
- F. [Administrative variance.] An administrative variance to streetscape standards may be granted by the director of planning for adaptive reuse and redevelopment projects as specified in this section or to preserve historic patterns. In addition to other required materials, an applicant for an administrative variance to the streetscape standards shall include a site plan, drawn to scale, showing the existing right-of-way and specific conditions of the lot.

**Table 5.1 Required Streetscape Dimensions** 

| Required Streetscape Dimensions (Minimum, unless stated) |                |                    |          |                      |                                |  |  |

Streetscape Figure—Local Streets, Single Family Residential Districts

Streetscape Figure—Local Streets, all Other Districts

Streetscape Figure—Arterial and Collector Streets

(Ord. No. 15-06, 8-25-2015)

Sec. 5.4.4. - Site and parking area landscaping.

- A. Single-family residential lots. Each single-family residential lot on which new development occurs shall be planted with a minimum of three (3) new trees. Street trees along the lot frontage shall count towards this requirement. The species and specifications for the trees to be planted in compliance with this requirement shall meet the requirements of a list approved by the county arborist.
- B. *Interior strips.* Interior to non-residential, mixed-use and multi-family developments, three-foot wide planted landscape strips shall be required along all interior drives and pedestrian paths.
- C. *Property perimeter landscape strip.* Along non-residential, mixed-use and multi-family development perimeter lot lines, a perimeter landscape strip shall be required, as follows:
  - 1. A five-foot-wide continuous perimeter landscape strip is required along all property lines that are not subject to streetscape requirements. This applies to individual tenant sites interior to a master planned project, even in instances where individual tenant sites do not have separately platted lot lines.

2.

A perimeter landscape strip shall include one (1) overstory deciduous shade tree, or three (3) understory or three (3) evergreen trees, for every fifty (50) linear feet at a minimum size of two-inch caliper for deciduous trees and eight-foot height for evergreen trees.

- 3. A perimeter landscape strip is not required where a transitional buffer is also required.
- D. *Parking area landscaping.* All surface parking lots that contain a total of fifteen (15) or more parking spaces that are constructed or redeveloped subsequent to the effective date of this chapter shall comply with the following requirements:
  - 1. A minimum of ten (10) percent of the total lot area of the parking lot shall be landscaped.
  - 2. Non-continuous barrier curbs shall be installed around the perimeter of the parking lot and around landscaped areas that are required herein, except where the perimeter abuts an adjacent building or structure and except at points of ingress and egress into the facility, so as to prevent encroachment of vehicles onto adjacent property, rights-of-way, sidewalks and landscaped areas.
    - a. Barrier curbs shall be a minimum of six (6) inches in height and six (6) inches in width, shall be concrete or stone, shall be securely installed, and shall be maintained in good condition.
  - 3. A continuous hedge, berm, or short wall with landscaping thereon, not to exceed three (3) feet in height shall be required between surface parking and an adjacent public street right-of-way.
  - 4. Tree and island quantity. A minimum of one (1) overstory tree per eight (8) parking spaces, and one (1) island per ten (10) parking spaces, shall be provided and maintained. No parking space shall be more than forty (40) feet from a tree.
  - 5. Landscape islands. All trees planted in a parking lot shall be planted in a landscape island, which island shall be a minimum of two hundred fifty (250) square feet.
  - 6. In addition to trees, ground cover shall also be provided in order to protect tree roots and to prevent erosion. Ground cover shall consist of shrubs, ivy, liriope, pine bark mulch, or other similar landscaping material.
  - 7. Ground cover shrubs in parking area landscaping shall be maintained at a maximum height of thirty (30) inches, except where such shrubs are screening the parking surface from an adjacent residential area.
  - 8. Newly planted trees in parking area landscaping shall be a minimum of two-inch caliper as measured at a height of six (6) inches above ground level, shall be a minimum of ten (10) feet in height at planting, shall have a thirty-foot minimum mature height, and shall be drought tolerant. Trees shall be planted at least thirty (30) inches from any barrier curb, so as to prevent injury to trees from vehicle bumpers. A minimum of seventy-five (75) percent of the trees planted pursuant to these requirements shall be deciduous hardwood shade trees.

about:blank 10/24

- 9. All landscaped areas shall be properly maintained in accordance with landscape plans approved as part of the land disturbance permit. In the event that a tree or any plant material dies, it shall be replaced within twelve (12) months so as to meet all requirements of this section and to allow for planting in the appropriate planting season.
- 10. All trees planted pursuant to the requirements of this section shall be counted for the purpose of meeting the tree planting and tree replacement requirements required by <u>section 14-39</u> of the Code.

(Ord. No. 15-06, 8-25-2015; Ord. No. 2022-2550, Pt. I, 1-26-2023)

### Sec. 5.4.5. - Transitional buffers.

- A. *Intent.* Transitional buffers are intended to create a visual screen in order to diminish the potential negative impacts of non-residential and mixed land uses on adjacent residential land uses. Similarly, transitional buffers diminish the potential negative impacts of higher intensity residential development on adjacent single-family residential land uses.
- B. *General requirements.* Natural or planted transitional buffers required by this article shall be established and permanently maintained by the property owner as follows:
  - 1. The required transitional buffer shall be depicted in detail on each site plan or plat prior to final approval. Type and location of natural and planted vegetation shall be included.
  - 2. Within the transitional buffer, the natural topography of the land shall be preserved and existing growth shall not be disturbed except where necessary to remove dead or diseased trees and undergrowth or to enhance the buffer with additional landscaping in order to provide a screen so as to prevent view of the higher density development from the lower density development.
  - 3. Grading or construction adjacent to the transitional buffer zone shall not disturb or encroach upon the transitional buffer zone.
  - 4. Notwithstanding subsection 3., if grading is required in the transitional buffer in order to prevent or control erosion, the area of such grading shall cover no more than twenty (20) percent of the required transitional buffer, shall be immediately replanted upon completion of easement improvements and shall avoid disturbance of the soil within the dripline of trees within the transitional buffer.
  - 5. Any approved utility crossings shall be perpendicular to the transitional buffer.
  - 6. A pedestrian walkway, a maximum width of five (5) feet, may be located in the buffer to provide pedestrian access to the adjoining property. Where a pedestrian walkway is provided, a gate shall be installed in the required screening fence.

7.

If existing vegetation in a buffer area does not meet the transitional buffer standards, a five-foot high, landscaped berm may be installed subject to the approval of the county arborist. Grading to construct the berm shall not remove significant plants designated by the county arborist as part of the approval of the landscaped berm.

- C. Buffer planting and materials. When the conditions of the existing natural topography and vegetation are insufficient to achieve the visual screening required by this section, a landscape planting plan to enhance the transitional buffer shall be prepared and implemented to supplement existing natural growth or to provide new plant materials of such growth characteristics as will provide a screen meeting the standards below:
  - 1. *Planting height*. Proposed planting as part of an enhanced transitional buffer shall have a height of at least six (6) feet at the time of planting and planted in a minimum of two (2) rows, with staggered on center spacing such that a continuous opaque screen is created within two (2) years of planting.
  - 2. *Plant types.* Plant species in an enhanced transitional buffer shall be evergreen, native, naturalized or other species well-adapted to the local climate and rainfall patterns, disease and pest-free, healthy and vigorous, and meet standard for American Nursery Stock, ANSI Z60.1.
  - 3. *Plant functions.* Plants shall be approved from a list made available from the planning department, but shall not be exclusive of other plants which may be suitable, provided they can provide a continuous opaque screen.
  - 4. Fences. Fences are required with transitional buffers and shall meet the requirements of section 5.4.7.
  - 5. *Wall and fence finishes.* Walls and fences shall be constructed with the finished or decorative side facing outward from the property.
- D. *Buffer dimensions and specifications*. Table 5.2(a) identifies the transitional buffer class required for each zoning district based on the zoning district to which it is adjacent. Table 5.2(b) summarizes the minimum width of the required transitional buffer for each transitional buffer class (A-E).

(Ord. No. 15-06, 8-25-2015)

## Sec. 5.4.6. - Screening.

Trash and recycling areas, loading areas, mechanical and utility equipment, parking decks, detention facilities, and outdoor storage shall be surrounded by opaque fences, walls, or vegetation. Vegetative screening shall be at least seventy-five (75) percent evergreen, with a minimum of two (2) rows of plants, and shall grow to a height of six (6) feet in two (2) years.

A. Loading areas. All loading areas must be screened from view so as not to be visible from any public street or adjacent property.

В.

about:blank 15/24

*Trash and recycling areas.* All dumpsters must be screened from view on all four (4) sides so as not to be visible from adjacent properties and the public street. The screen may incorporate access to the dumpster by using a wood fence or other opaque device to serve as a gate.

- C. *Parking decks.* All parking decks and above-ground parking structures shall have a six-foot wide landscape strip immediately contiguous to the façade of the parking deck or structure, unless otherwise screened from view by an intervening building.
- D. *Mechanical and utility equipment.* All mechanical and utility equipment must be screened from view so as not to be visible from any public street.
- E. *Detention facilities.* In addition to fencing requirements set forth in <u>chapter 14</u> of the Code, detention facilities shall be planted with evergreen plant material consistent with buffer standards in section 5.4.5.C. No trees shall be allowed in the ten-foot maintenance shelf. However, detention facilities "designed as open space amenities" may be approved by the director of planning and in compliance with division 5 of this article. A detention facility located in a historic district that is subject to architectural design review shall require a certificate of appropriateness, for appearance only, from the DeKalb County Historic Preservation Commission.
- F. *Outdoor storage*. See <u>section 4.2.38</u> for screening regulations for outdoor storage of materials, supplies, equipment or vehicles regulations.

(Ord. No. 15-06, 8-25-2015)

Sec. 5.4.7. - Walls, fences, and retaining walls.

## Freestanding Walls and Fences.

- A. General provisions, freestanding walls and fences.
  - 1. When this chapter requires a wall or fence to be constructed, the wall or fence shall be completed prior to the issuance of a certificate of occupancy for the principal structure.
  - 2. No wall or fence shall be constructed in any public right-of-way.
  - 3. See Table 5.3 Freestanding fence and wall standards for additional requirements.
  - 4. The height of a wall or fence is measured along the adjacent finished grade. However, if located within fifteen (15) feet of any street, and if the street grade is above the adjacent finished grade, the fence or wall height may be measured from the street. Grade and height shall be determined by a registered surveyor or licensed engineer.

about:blank 16/24

- 5. No freestanding walls or fences may be composed of exposed common concrete block, tires, junk, pallets, railroad ties, loose stone, vinyl and other discarded materials.
- 6. With the exception of M and M-2 zoning districts, freestanding walls or fences erected within the front yard shall be constructed of brick, stone, wood, wrought iron, or material simulating wrought iron. Any other material, including but not limited to, chain link and other wire fences are prohibited in the front yards of all districts, with the exception of M and M-2 zoning districts.
- 7. Fences and walls in the M and M-2 zoning districts where exempt from regulations governing the height and materials shall not impede necessary safe line of sight for entry and egress.
- 8. Security entrance gates in multifamily or non-residential districts shall be located at least fifty (50) feet from the property line in order to ensure safe queuing, ingress to and egress from the property.
- 9. Temporary fencing may be erected during construction for security and public safety purposes, provided that it does not impede necessary safe line of sight for entry and egress.
- 10. Fence gates in single family residential may be six (6) feet in the front yard. Gates shall be set back a minimum of fifteen (15) feet from right-of-way.

## **Retaining Walls**

- C. General provisions, retaining walls and wing walls.
  - 1. Retaining walls shall be located outside the public right-of-way.
  - 2. Retaining walls shall be located within the confines of the owner's/applicant's property.
  - 3. Retaining walls shall comply with applicable easement restrictions.
  - 4. Retaining walls shall not be located within undisturbed stream buffers, transitional buffers, floodplains, drainage easements, or drainage ways in a manner that impedes the flow of water.
  - 5. Retaining walls four (4) feet or more, measured from finished grade shall be constructed of reinforced concrete or other masonry materials, or gabion/vegetative gabion walls. Treated timbers may be used for walls less than four (4) feet in height and no permanent structure is supported by the soil retained by the retaining wall.
  - 6. No signage shall be placed on top of walls.

D.

Retaining walls on single family lots. Retaining walls on lots under construction for single-family dwellings shall abide by the following: (i) the entire wall structure, including footing, shall not encroach on adjacent property. (ii) drainage shall be properly conveyed along the length of the wall in conformance with construction standards, and (iii) a construction/maintenance easement shall be obtained from the adjoining property owner, if applicable.

- 1. Newly constructed retaining walls shall not be higher than four (4) feet measured from finished grade; however, existing retaining walls may be repaired and replaced so long as the height of the repaired or replaced wall is no greater than the original height of the wall.
- 2. Wing walls that are integrated with the foundation of the structure shall not exceed four (4) feet in height, without a variance. Wing walls may extend into the front or rear yard for a distance not to exceed ten (10) feet and into the side yard to a point not closer than five (5) feet from the side lot line. If a wing wall turns direction, from that point it is no longer a wing wall and is considered a retaining wall. Wing walls exceeding thirty (30) inches above finished grade must have a guardrail, a minimum of thirty-six (36) inches and a maximum of forty-eight (48) inches in height. Wing walls may not exceed twelve (12) inches above grade at the higher side elevation.
- 3. Retaining walls may be tiered but no single wall shall exceed four (4) feet in height. All tiered wall design shall be certified by a licensed engineer.
- 4. Retaining walls on building lots must be included on the final plat and/or the building permit plans.
- 5. All retaining walls constructed as a drainage component, as described in GA. Soil and Water Conservation Commission Green Book, shall require design by a licensed engineer.
- 6. A variance is required to increase the height of a retaining wall as follows:
  - a. If exceptional topographical restrictions exist that were not created by the owner or his agent on a lot, and it is established to the reasonable satisfaction of the director of planning that no practical alternative design of such wall is feasible, then the director of planning may, upon application therefore, grant an administrative variance allowing a wall up to six (6) feet. An applicant for a retaining wall administrative variance shall include with the application a certified field-run site plan or a topographical map certified by a licensed engineer or landscape architect.
  - b. If exceptional topographical restrictions exist that were not created by the owner or his agent on the lot, and it is established to the satisfaction of the zoning board of appeals that no practical alternative design of such wall is feasible, the zoning board of appeals may, upon application therefor, grant a variance allowing newly constructed retaining walls to be up to eight (8)

about:blank 18/24

feet. Notwithstanding any provision in this chapter to the contrary, no variance may be granted to allow the height of a retaining wall above eight (8) feet. In addition to the materials otherwise required for a variance in division 5 of <u>article 7</u> of this chapter, an applicant for a retaining wall variance shall provide a certified field-run site plan or a topographical map certified by a licensed engineer or landscape architect with the application for the variance.

- E. Retaining walls standards for development under a land disturbance permit.
  - 1. Retaining walls above grade and when the wall is facing adjoining residential or non-residential zoned or used property shall be as indicated in Table 5.3.
  - 2. Any single or tiered retaining wall over the maximum height shall be approved by the zoning board of appeals. The zoning board of appeals shall consider the following in making a decision:
    - a. Grading changes necessitated for gravity flow and sewer connections.
    - b. Grading changes necessitated to meet chapter 14 road construction standards.
    - c. Extremely steep slope, greater than three (3) to one (1) topographical changes on site as compared to adjacent existing subdivision.
    - d. Structural engineer's sealed and signed statement of their evaluation of the consequence of retaining wall failure and recommendations for reducing the consequence and risk of failure in the event of failure. This may include increasing the required factors of safety for sliding, overturning, bearing capacity, and global stability. The applicant shall provide a plan of action to include additional setbacks from both sides of the retaining wall, frequency of inspection, and maintenance practices.
    - e. Whether the wall height is necessary to address life/safety.
    - f. A variance to increase height granted by the ZBA may result in an increased setback.
  - 3. The setback area between the wall and the property line shall be planted to provide a screen.
  - 4. Retaining walls over six (6) feet may be tiered, up to twelve (12) feet facing residential or sixteen (16) feet facing non-residential without a variance. The wall design shall be submitted by a licensed engineer and be approved by the department.
  - 5. Tiered walls shall have a maximum height of six (6) feet per tier facing residential and eight (8) feet per tier facing non-residential.

    Depth of bench shall meet engineering specifications. Bench area shall be landscaped.

6.

Bench between tiered walls shall be a minimum five-foot in depth, and landscaped. Any proposed plantings shall not have a negative impact on the retaining wall system.

- 7. Landscaping in front of retaining walls shall meet the standards of section 27-5.4.5 Buffer planting and materials. Plant materials used on tiered walls may include shrubs and vines and other plants that do not impact the integrity of the walls.
- F. Retaining walls shall be shown on sketch plats, land disturbance permit plans, final plats, and building plans.
- G. Permitting and inspection of retaining walls.
  - 1. Retaining walls that are four (4) feet or more in height measured from the finished grade to the top of wall shall be certified by a licensed engineer. A building permit and building inspection are required.
  - 2. For poured in place retaining walls, a footing inspection must be scheduled and successfully passed prior to pouring. Once the footing has been poured, a wall inspection shall be scheduled, performed and approved.
  - 3. For treated lumber tie-walls, a wall inspection shall be scheduled and successfully passed for verification of adequate dead-men and proper drainage design for the wall prior to backfill material being installed.
  - 4. After the wall is completely finished, an as-built certification is required before a certificate of occupancy is issued.

### **Table 5.3 Fence and Wall Standards**

| Freestanding walls and fences        |                              |  |  |  |  |  |  |
|--------------------------------------|------------------------------|--|--|--|--|--|--|
|                                      | (other than retaining walls) |  |  |  |  |  |  |
| Use Height Setbacks Variance Allowed |                              |  |  |  |  |  |  |

about:blank 20/24

| Fences in the front yard and side corner yard of single family detached residences   | Up to four (4) feet from finished or street grade.   | Shall not be within the right-<br>of-way   | Administrative variance required to increase wall height from four (4) to six (6) feet based on topography.  May apply for a variance from zoning board of appeals to increase height up to eight (8) feet max. |
|--|--|--|---|
| Fences and walls in interior side or rear yards of single family detached residential  | Up to eight (8) feet.  | Fences may be up to property line; walls, including footings, must not encroach over property line.  | May apply for a variance from zoning board of appeals to increase height up to ten (10) feet max.   |
| Fences and walls on the perimeter of single family detached, attached and multifamily developments (i.e., privacy, decorative) | Six (6) feet adjoining the street, eight (8) feet all other property lines                                 | Fences may be up to property line; walls, including footings, must not encroach over property line. Shall not be within the right-of-way.    | May apply for a variance from zoning board of appeals to increase height up to ten (10) feet max.   |
| Industrial   | No limit if adjoining non-<br>residential use.<br>Eight (8) feet if adjoining<br>residential zoning or use | Fences may be up to the property line; walls, including footings, must not encroach over property line. Shall not be within the right-of-way | If next to residential, may apply for a variance from zoning board of appeals to increase height up to ten (10) feet max.   |

about:blank 21/24

| Single-family subdivisions and multi-family developments identification or monument walls | Up to eight (8)   | Shall not be located in right-<br>of-way. Setback varies,<br>depending on sight visibility. | May apply for a variance from zoning board of appeals to increase height up to ten (10) feet max).   |
|---|---|---|--|
| Non-residential, and mixed-<br>use zoning districts                                       | Up to ten (10) feet if adjoining non-residential use. Eight (8) feet if adjoining residential zoning or use | Shall not be located in right-<br>of-way. Setback varies,<br>depends on sight visibility.   | May apply for a variance from zoning board of appeals to increase height up to twelve (12) feet max. |

| Retaining walls (exposed height)                                 |  |  |   |  |  |  |  |
|--|--|--|---|--|--|--|--|
| Use  | Height   | Setbacks   | Variance Allowed  |  |  |  |  |
| Retaining walls for individual single family detached residences | Up to four (4) feet from finished or street grade. | Retaining walls may be up to property line, including footings, shall not encroach over property line. Shall not be within the right-of-way. | Administrative variance required to increase wall height from four (4) feet to six (6) feet based on topography. Variance from zoning board of appeals to increase height up to eight (8) feet max. |  |  |  |  |

about:blank 22/24

| Wing walls for single family detached residences  | Four (4) feet  | May extend ten (10) feet in front and rear yard, five-foot setback from side property line  | May apply for a variance from zoning board of appeals to increase height up to eight (8) feet max.   |
|---|--|---|--|
| Retaining wall for all development under a land disturbance permit adjacent to any residential district or use. | Max. six (6) feet. Tiered walls up to twelve (12) feet without variance. | Ten-foot setback from property line, reserved for landscaping. Landscape material shall have mature height as high as or higher than wall. A minimum five-foot bench on tiered walls, landscaped. | May apply for a variance from zoning board of appeals to increase height above six (6) feet based on topography or unique site development conditions. Must be accompanied by engineer certification supporting need for increased height. |

about:blank 23/24

Retaining walls for all development under a land disturbance permit adjacent to non-residential zoning district or use

Max. twelve (12) feet.

Tiered walls up to sixteen (16) feet without variance.

Exempt for walls screened by intervening building. Building must be as high as or higher than wall.

Ten-foot setback from property line, reserved for landscaping. Landscape material shall have mature height as high as or higher than wall. A minimum five-foot bench on tiered walls, landscaped

May apply for a variance from zoning board of appeals to increase height above twelve (12) feet based on topography or unique site development conditions.

Must be accompanied by engineer certification supporting need for increased height.

(Ord. No. 15-06, 8-25-2015; Ord. No. 17-07, Pt. I, 12-12-2017)

about:blank 24/24

Sec. 4.1.3. - Use table.

Table 4.1 indicates the permitted uses within the base zoning districts. Even though a use is listed as an allowable use within a particular base zoning district, additional use restrictions may apply based on the applicable overlay zoning district requirements specified in <u>article 3</u>, overlay districts.

- A. The uses listed in Table 4.1 shall be permitted only within the zoning districts identified, and no use shall be established and no structure associated with such use shall be erected, structurally altered or enlarged unless the use is permitted as:
  - 1. A permitted use (P);
  - 2. A special use (SP) subject to the special land use permit application procedures specified in article 7:
  - 3. An administratively approved use (SA) subject to the special administrative permit procedures specified in article 7:
  - 4. An accessory use (Pa) as regulated by this <u>article 4</u>. Table 4.1 does not list all accessory uses but clarifies uses acceptable as accessory, though not typically considered principal uses for the zoning classification.
  - 5. Uses lawfully established prior to the effective date of this zoning ordinance.
- B. Any use not listed in Table 4.1 below or interpreted to be allowed by the director of planning pursuant to <u>section 4.1.2</u> is prohibited. Any applicant denied a permit to allow a use of property in a zoning district other than as provided in this section may file an appeal before the zoning board of appeals as provided in <u>article 7</u>.
- C. If there is a conflict between Table 4.1 and the text of this chapter, the text shall prevail.

### Sec. 6.1.4. - Off-street parking ratios.

- A. Minimum on-site parking requirements may be reduced through use of shared parking, in accordance with section 6.1.5.
- B. In residential districts in which garage space is provided, the garage space may count for no more than one (1) required space per two hundred (200) square feet of garage space.
- C. Tandem parking is permitted in association with all single-family detached and single-family attached housing types.
- D. Minimum and maximum parking ratios: Unless otherwise regulated elsewhere in this chapter, off-street parking spaces shall be provided for all uses listed are specified in Table 6.2. Unless otherwise noted, the parking requirement shall be based on the gross square footage of the building or buildings devoted to the particular use specified. Maximum parking standards shall not apply to existing uses so long as the building or parking lot is not expanded.
- E. Phased development. Where a project is intended to be developed in phases, the director of planning may approve phased development of a parking lot intended to serve current and future development.
- F. Reduction of minimum parking requirements. The minimum number of required spaces described in Table 6.2 for a particular use may be reduced by ten (10) percent by the director of planning pursuant to an administrative variance in compliance with <u>article 7</u>. If the use is within one thousand (1,000) feet of a designated heavy rail, streetcar/light rail or bus rapid transit station, the minimum number of required spaces may be reduced by twenty-five (25) percent in accordance with <u>article 7</u>.
- G. Carpool/vanpool parking. For office, industrial, and institutional uses where there are more than twenty (20) parking spaces on the site, the following standards shall be met:
  - 1. At least five (5) percent of the parking spaces on site must be reserved for carpool use.
  - 2. Except as otherwise provided by applicable law, parking lots shall be designed so as to provide the most convenient access to building entrances by persons arriving by vanpools and carpools. In the event of a conflict between the priority described in this subsection and section 6.1.16, this subsection shall prevail.
  - 3. Signs shall be posted identifying spaces reserved for carpool use.

### **Table 6.2: Off-street Parking Ratios**

### Minimum and Maximum Parking Spaces

about:blank 1/12

### Residential

| Use  | Minimum Parking Spaces Required  | Maximum Parking Spaces Allowed  |
|--|--|---|
| Detached single-family dwelling                | Two (2) spaces per dwelling unit.  | Four (4) spaces per dwelling unit.  |
| Single-Family cottage dwellings                | One (1) space per dwelling unit, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking.                                     | Two (2) spaces per dwelling unit, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking.                         |
| Two-family and three-family dwellings          | One (1) space per dwelling unit.   | Four (4) spaces per dwelling unit.  |
| Detached single-family condominium             | Two (2) spaces per dwelling unit.  | Four (4) spaces per dwelling unit.  |
| Attached single-family dwelling                | One and a half (1.5) spaces per dwelling unit, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking.                       | Three (3) spaces per dwelling unit, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking.                       |
| Attached two-family and three-family dwellings | One and a half (1.5) spaces per dwelling unit, not including garage, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking. | Three (3) spaces per dwelling unit, not including garage, plus one-quarter (0.25) space per dwelling unit to accommodate guest parking. |
| Multi-family dwellings (1 or more bdrms)       | One and one-half (1.5) spaces for every dwelling unit.   | Three (3) spaces for every dwelling unit.   |

about:blank 11/12

# 6 – Rebuild-Ability from the Zoning Ordinance

### Sec. 8.1.3. - Legal nonconforming lot.

A lot of record that at the effective date of this zoning ordinance does not conform to the applicable minimum road frontage requirement, minimum lot area, or lot width requirements for the zoning district in which it is located may still be used as a building site provided that the height, buffer, setback, and other dimensional requirements of the zoning district in which the lot of record is located are complied with, or a variance therefrom is obtained.

(Ord. No. 15-06, 8-25-2015)

### Sec. 8.1.5. - Nonconforming use.

A legal use in existence on the effective date of this zoning ordinance or any amendment thereto may be continued even though such use does not conform with the use provisions of the zoning district in which said use is located, except as otherwise provided in this section.

- A. Change of use. A nonconforming use shall not be changed to another nonconforming use. A change in tenancy or ownership shall not constitute termination or abandonment of the nonconforming use, provided that the use itself remains unchanged and is continuously maintained.
- B. Discontinuance or abandonment. A nonconforming use shall not be re-established after discontinuance or abandonment for six (6) consecutive months, unless the cessation of the nonconforming use is a direct result of governmental action impeding access to the property. Vacancy or non-use of a building for six (6) continuous months, regardless of the intent of the owner or tenant, shall constitute discontinuance or abandonment under this subsection.
- C. A nonconforming use of land shall not be enlarged, expanded, moved, or otherwise altered in any manner that increases the degree of nonconformity.

(Ord. No. 15-06, 8-25-2015)

### Sec. 8.1.6. - Nonconforming structures.

A. A legal structure in existence on the effective date of this zoning ordinance or any amendment thereto that could not presently be built under the provisions of this chapter because of restrictions on building area, lot coverage, height, minimum yard setbacks, or other characteristics of the structure or its location on the lot shall be deemed a legal nonconforming structure subject to this <u>article</u>

about:blank 1/2

<u>8</u>.

- B. No legal nonconforming structure shall be enlarged, or structurally altered, in a way that increases its degree of nonconformity, except as expressly permitted in this <u>article 8</u>.
- C. Alteration of legal nonconforming structures occupied by permitted, conforming uses may be allowed for improvement or modification, provided that the structure may not be enlarged and the alterations must either comply with this chapter or result in a reduction in site or structure nonconformity. See also <u>section 8.1.16</u>.

(Ord. No. 15-06, 8-25-2015)

Sec. 8.1.15. - Reconstruction of damaged or destroyed nonconforming structures.

A legal nonconforming building or structure that has been damaged by fire, flood or other natural cause to an extent that the estimated cost of reconstruction does not exceed sixty (60) percent of its fair market value according to the DeKalb County Tax Assessor's valuation for the tax year in which the damage occurred, as determined by the director of planning, may be reconstructed and used as it was prior to being damaged if a complete permit application is submitted for said re-construction within two (2) years of the date of the damage and the work progresses continuously upon issuance of the permit therefor. If said building or structure has been determined by the director of planning to have been damaged to an extent that the estimated cost of reconstruction exceeds sixty (60) percent of its fair market value according to the DeKalb County Tax Assessor's valuation for the tax year in which the damage occurred, then any repair, reconstruction or new construction shall conform to the then existing requirements of the zoning district in which said building or structure is located.

### SPECIAL LAND USE PERMIT APPLICATION

DEPARTMENT OF PLANNING & SUSTAINABILITY

**IMPACT ANALYSIS** 

Criteria: Sec 27-7.4.6 The following criteria shall be considered by the Department of Planning and Sustainability, the Planning Commission and the Board of Commissioners in evaluating and deciding any application for a special land use permit. No application for a special land use permit shall be granted by the Board of Commissioners unless satisfactory provisions and arrangements have been made concerning each of the following factors, all of which are applicable to each application, and unless the application is in compliance with all applicable regulations in Article 4.

A. Adequacy of the size of the site for the use contemplated and whether or not adequate land area is available for the proposed use including provision of all required yards, open space, off-street parking, transitional buffer zones, and all other applicable requirements of the zoning district in which the use is proposed to be located.

Response – Based on our initial layout, it has been determined that there is adequate space for a ready mix plant.

B. Compatibility of the proposed use with adjacent properties and land uses and with other properties and land uses in the district, and whether the proposed use will create adverse impacts upon any adjoining land use by reason of traffic volume/congestion, noise, smoke, odor, dust, or vibration generated by the proposed use.

Response – The current site is zoned M-1 & M-2, with a asphalt plant along the same street. There is not believed conflict with traffic or adverse transmissions that can come from the site as mentioned.

C. Adequacy of public services, public (or private) facilities, and utilities to serve the proposed use.

Response – Public utilities that exist can server the site.

D. Adequacy of the public street on which the use is proposed to be located and whether or not there is sufficient traffic-carrying capacity for the use proposed so as not to unduly increase traffic and create congestion in the area.

Response – The new facility will have less than 100 trips daily, based on the improvements to the adjacent intersection and the current traffic, we do not anticipate any congestion or traffic issues.

E. Adequacy of ingress and egress to the subject property and to all proposed buildings, structures, and uses thereon, with particular reference to pedestrian and automotive safety and convenience, traffic flow and control, and access in the event of fire or other emergency.

Response – The property will have a large access entrance, with appropriate distance from closes intersection to allow ingress/egress. The location of access allows for sufficient view of traffic from both directions allowing for safety.

F. Whether the proposed use will create adverse impacts upon any adjoining land use by reason of the manner and hours of operation of the proposed use.

Response – The facility will operate during similar hours as adjacent properties, approximately 7am-5pm Mon-Fri. In the event of special hours, because of Highway supply projects, the owner will send out notices of start and end dates for limited special hours.

G. Whether the proposed use is otherwise consistent with the requirements of the zoning district classification in which the use is proposed to be located.

Response – The site is currently M1 & M2, a application to rezone to all M-2 is being submitted in parallel with the SLUP.

H. Whether the proposed use is consistent with, advances, conflicts, or detracts from the policies of the comprehensive plan.

Response – Yes. Proposed use is consistent with the policies of the comprehensive plan.

I. Whether there is adequate provision of refuse and service areas.

Response – Yes. There is adequate refuse and service areas.

J. Whether the length of time for which the special land use permit is granted should be limited in duration.

Response – No limit in duration is sought.

K. Whether the size, scale and massing of proposed buildings are appropriate in relation to the size of the subject property and in relation to the size, scale and massing of adjacent and nearby lots and buildings; and whether the proposed use will create any shadow impact on any adjoining lot or building as a result of the proposed building height.

Response – The facility will have a two-story ~900 sqft building that will not any impact as above mentioned.

L. Whether the proposed use will adversely affect historic buildings, sites, districts, or archaeological resources.

Response – No. There is no known impact to the above mentioned.

M. Whether the proposed use satisfies the requirements contained within the supplemental regulations for such special land use permit.

Response – Yes. The proposed use of the concrete plant satisfies the requirements contained within the supplemental regulations for such special land use permit.

N. Whether the proposed use would be consistent with the needs of the neighborhood or the community as a whole, as expressed and evidenced during the review process.

Response – Yes. During the period of sending notices and holding the citizens review meeting, only support was shown for this project to move forward. No negative comments were received.

| Show how proposed M rezoning and SLUP is compatible with surrounding area (including any residential   |
| uses) and the LIND (Light Industrial) Character Area of the 2050 Comprehensive Plan. Show compliance   |
| with M zoning requirements including but not limited to, building materials, minimum building setbacks,  |
| maximum building height, minimum lot area, , minimum parking requirements, sidewalk and street tree  |
| requirements, etc. Parking lots must be paved, striped, and landscaped per Article 6 of the Zoning Ordinance.  |
| Show compliance with outdoor storage supplemental regulations (Section 4.2.38) and heavy industrial uses   |
| supplemental regulations (Section 4.2.29) of the zoning ordinance. Applicant may be required to document   |
| how air, water, noise, odor, and dust will be mitigated via a letter from an environmental engineering firm. c:\users\lahill\appdata\local\microsoft\windows\inetcache\content.outlook\xwtr463m\3298 fayetteville rd completed pre-app form.docx |

## **DEPARTMENT OF PLANNING & SUSTAINABILITY**

| During review process it will have to be confirmed whether a DRI is or isn't required. An air quality permit     |
|--|
| from the Georgia Environmental Protection Department may be required. Applicant may want to contact              |
| Transportation Department regarding the access to the project which is currently very close to the intersection. |
| Provide and show any floodplains and stream buffer areas on concept plan. Applicant is encouraged to review      |
| the SLUP approval of a nearby asphalt plant (HEH Paving) in July of 2015 to see what issues/documentation        |
| may be required for the proposed asphalt plant.  |
|  |
|  |

This only a <u>preliminary</u> review and is not a complete list of zoning requirements, a final and complete review and official Planning Department recommendation will be done upon official submission of a rezoning and SLUP application including a concept plan. If the application were to be approved, the applicant would have to submit and obtain approval of a Land Disturbance Permit and Building Permits.

| Planner:John Reid |   | 08/29/24 |  |
