Public Hearing: YES ⊠ **NO** □ **Department:** Planning & Sustainability

SUBJECT:

COMMISSION DISTRICT(S): Commission District 03 Super District 06

Application of Linda Dunlavy, Dunlavy Law Group, LLC to rezone property from R-75 (Residential Medium Lot-75) zoning district to RSM (Small Lot Residential Mix) zoning district to allow for the development of twelve (12) single-family attached townhomes, at 2452 La Fortune Drive a.k.a. 2724 Kelly Lake Road.

PETITION NO: N11-2024-1112 Z-24-1247194

PROPOSED USE: Development of single-family, attached townhomes.

LOCATION: 2452 La Fortune Drive a.k.a. 2724 Kelly Lake Road, Decatur, Georgia 30032

PARCEL NO.: 15 137 03 024

INFO. CONTACT: Andrea Folgherait, Sr. Planner

PHONE NUMBER: 404-371-2155

PURPOSE:

Application of Linda Dunlavy, Dunlavy Law Group, LLC to rezone property from R-75 (Residential Medium Lot-75) zoning district to RSM (Small Lot Residential Mix) zoning district to allow for the development of twelve (12) single-family attached townhomes.

RECOMMENDATION:

COMMUNITY COUNCIL: (October 2024) Denial.

PLANNING COMMISSION: (November 7, 2024) Three-cycle deferral.

PLANNING STAFF: Denial.

STAFF ANALYSIS: The applicant is seeking to rezone the subject property from the R-75 (Residential Medium Lot-75) Zoning District to the RSM (Residential Small Mix) Zoning District for the development of a singlefamily attached townhome community. The townhome development consists of twelve (12) attached units described as a "eco-friendly" community. The units are proposed to be built to green building standards (solar roofs, electric charging stations, sustainable materials, energy efficient utilities). The proposed site design preserves more than half of the site as open space for the flood plain and stream buffers. The proposed RSM zoning district is consistent with the RSM zoning district approximately three hundred and fifty (350) feet north of the subject site, which may provide a transition between the commercial corridor along Candler Road and the single-family neighborhoods to the southeast of the subject site. The subject site is located close to the higher intensity I-20 Overlay District, a Neighborhood Center (NC) Character Area, and multiple mixed-use zoning (MZ) districts. This further supports a potential zoning of RSM at the subject site. The rezone proposal's density of three (3) units per acre is consistent with the maximum density of eight (8) units per acre allowed by the SUB (Suburban) Character Area. However, based on the submitted information and the extreme environmental constraints of the site (over half of the site falls within stream buffer/floodplain), it appears that the proposed land use may not be suitable given the site's small buildable area. The plan shows the townhouse development occurring on the northeast portion of the property. While this is the only portion of the site that appears buildable, it is also directly adjacent to the property line of a single-family neighborhood. The proposal provides no transitional space between the more intense townhouse and the existing neighborhood, undermining the established development patterns of the neighborhood. Therefore, the proposed land use on this property may not be consistent with the polices and strategies of the SUB Character Area to increase housing choices and income diversity without significantly altering established neighborhood development patterns (Pg. 41, 2050 Unified Plan). While the proposed RSM zoning district and the overall density appear to be consistent with the surrounding area, the proposed land use and site plan design submitted in September of 2024 appears to present significant deficiencies. Site Plan Review: The proposed RSM zoning district allows a maximum base density of four (4) dwelling units per acre. The proposed development consists of 12 units at a density of approximately three (3) units per acre (see Site Plan "C-1" enclosed). While the applicant meets the density threshold, the design significantly encroaches into the 75-foot County Stream Buffer. The encroachment will require a variance from the Zoning Board of Appeals (ZBA). The site plan incorporates one (1) twenty-six (26) foot diameter permanent dead-end street. Based upon Section 14-194 Permanent Dead-end Streets; Cul-de-sac Staff is unclear if the street design meets the maximum cul-de-sac length (1,200 feet) and/or private drive requirements. Street length and type is not clarified on Site Plan C-1. Interdepartmental comments should be reviewed (enclosed). The proposed density of 3 units per acre is consistent with the maximum densities allowed by the SUB character area, however, a less dense residential use (such as a duplex or triplex) may be more consistent with the intent of the SUB character area and in this location, while increasing the density currently existing on the site. In consideration of a project redesign, the applicant should clarify if the proposed units will be fee-simple or a condominium form of ownership and provide clarity as to whether the project complies with all floodplains, stream buffer, sidewalk, streetscaping, and road width requirements of the Zoning Ordinance. An appropriate redesign may support the intent of the SUB Character Area, which is to primarily preserve established neighborhoods. However, the proposed land use appears to be overly dense for the subject site due to the stream buffer and flood plain. Therefore, upon review of Section 7.3.5 (A-H), Staff is recommending "Denial" as the proposal does not demonstrate appropriate compatibility and consistency with the surrounding area.

PLANNING COMMISSION VOTE: (November 7, 2024) Three-cycle deferral 5-1-0. Jan Costello moved, Jana Johnson seconded for a three-cycle deferral to the May 2025 zoning agenda. Vivian Moore opposed. (*The first motion by Vivian Moore to deny, failed due to lack of a second.)

COMMUNITY COUNCIL VOTE/RECOMMENDATION: (October 2024) Denial 4-3-0 due to the proposed townhomes not being consistent with the adjacent single-family detached neighborhood.

Planning Commission Hearing Date: November 7, 2024 Board of Commissioners Hearing Date: November 21, 2024

STAFF ANALYSIS

Case No.:	Z-24-1247194	Agenda #: 2024-1112		
Address:	2452 La Fortune Drive	Commission District: 03 Super District: 06

Surrounding Properties:	North: R-75 (Residential Medium Lot-75) East: RSM (Residential Small Mix), MR-2 (Medium Density -2) South: MZ (Multiple Zoning) MR-2 West: R-75			
Comprehensive Plan:	SUB (Suburban) Co	onsistent X Inconsistent		

Staff Recommendation: Denial.

The applicant is seeking to rezone the subject property from the R-75 (Residential Medium Lot-75) Zoning District to the RSM (Residential Small Mix) Zoning District for the development of a single-family attached townhome community. The townhome development consists of twelve (12) attached units described as a "eco-friendly" community. The units are proposed to be built to green building standards (solar roofs, electric charging stations, sustainable materials, energy efficient utilities). The proposed site design preserves more than half of the site as open space for the flood plain and stream buffers.

The proposed RSM zoning district is consistent with the RSM zoning district approximately three hundred and fifty (350) feet north of the subject site, which may provide a transition between the commercial corridor along Candler Road and the single-family neighborhoods to the southeast of the subject site. The subject site is located close to the higher intensity I-20 Overlay District, a Neighborhood Center (NC) Character Area, and multiple mixed-use zoning (MZ) districts. This further supports a potential zoning of RSM at the subject site. The rezone proposal's density of three (3) units per acre is consistent with the maximum density of eight (8) units per acre allowed by the SUB (Suburban) Character Area.

However, based on the submitted information and the extreme environmental constraints of the site (over half of the site falls within stream buffer/floodplain), it appears that the proposed land use may not be suitable given the site's small buildable area. The plan shows the townhouse development occurring on the northeast portion of the property. While this is the only portion of the site that appears buildable, it is also directly adjacent to the property line of a single-family neighborhood. The proposal provides no transitional space between the more intense townhouse and the existing neighborhood, undermining the established development patterns of the neighborhood. Therefore, the proposed land use on this property may not be consistent with the polices and strategies of the SUB Character Area to increase housing choices and income diversity without significantly altering established neighborhood development patterns (Pg. 41, 2050 Unified Plan). While the proposed RSM zoning district and the overall density appear to be consistent with the surrounding area, the proposed land use and site plan design submitted in September of 2024 appears to present significant deficiencies.

Site Plan Review:

The proposed RSM zoning district allows a maximum base density of four (4) dwelling units per acre. The proposed development consists of 12 units at a density of approximately three (3) units per acre (see Site Plan "C-1" enclosed). While the applicant meets the density threshold, the design significantly encroaches into the 75-foot County Stream Buffer. The encroachment will require a variance from the Zoning Board of Appeals (ZBA). The site plan incorporates one (1) twenty-six (26) foot diameter permanent dead-end street. Based upon *Section 14-194 Permanent Dead-end Streets; Cul-de-sac* Staff is unclear if the street design meets the maximum cul-de-sac length (1,200 feet) and/or private drive requirements. Street length and type is not clarified on *Site Plan C-1*. Interdepartmental comments should be reviewed (enclosed).

The proposed density of 3 units per acre is consistent with the maximum densities allowed by the SUB character area, however, a less dense residential use (such as a duplex or triplex) may be more consistent with the intent of the SUB character area and in this location, while increasing the density currently existing on the site. In consideration of a project redesign, the applicant should clarify if the proposed units will be fee-simple or a condominium form of ownership and provide clarity as to whether the project complies with all floodplains, stream buffer, sidewalk, streetscaping, and road width requirements of the *Zoning Ordinance*. An appropriate redesign may support the intent of the SUB Character Area, which is to primarily preserve established neighborhoods. However, the proposed land use appears to be overly dense for the subject site due to the stream buffer and flood plain. Therefore, upon review of *Section 7.3.5 (A-H)*, Staff is recommending a *denial* as the proposal does not demonstrate appropriate compatibility and consistency with the surrounding area.

Interim Director Cedric Hudson

ZONING COMMENTS – OCTOBER 2024

N1. (SLUP-24-1247188) 4293 Hambrick Road: No overlay district in place. No changes to the structure just the functional property use. Roadway classified as Local. No proposed changes or edits to the property frontage.

N2. (**Z-24-1247190**) **1491, 1531 & 1555 Austin Drive:** No overlay district in place. No site distance issues. Proposed improvement along a roadway classified as a collector: Rezoning and property upgrade; Shoulder improvements requirements in Zoning Code 5.4.3, 10-foot multiuse path with pedestrian scale streetlights. Project is on a bus route maintain exiting Marta bus stops.

N3. (Z-24-1247191) 3960 Rockbridge Road: No overlay restrictions. Road classified as Minor Arterial. Regulatory traffic signs posted at 45 MPH. No site distance issues to note. Rezoning and reusage of property would require proper parking lot marking for ingress and egress with plaza directly in front of subject property. Right and Left turning issues should be mitigated with proper Traffic engineering evaluation in reference to placement of parking lot entrance and exit. Would consider placing KIDS AT PLAY (NON regulatory) warning signs in advance of subject property in both directions. Contact Dekalb County Roads and Drainage for signage installation. Project is on along Marta bus route.

N4. (**Z-24-1247192**) **3089 Snapfinger Road:** Roadway classification Major Arterial. Snapfinger Road is SR 155. Regulatory posted speed is 45MPH. Limited sight distance to driveway. MUTCD calls for Vehicular warning signs Section2C.49. Subject parcel driveway has limited sight distance. Advance warning signs should be posted on the shoulder and median for both lanes going east bound. Contact (JLivingston@dot.ga.gov) with GDOT for on state routes.

N5. (**Z-24-1247194**) **2452 La Fortune Drive:** No overlay district. Roadway classification is local road. Shoulder/Frontage improvements requirements in Zoning Code 5.4.3, 10-foot multiuse path with pedestrian scale streetlights.

To: Ms. LaSondra Hill, Planning

From: Ryan Cira, Environmental Health Director

Cc: Alan Gaines, Deputy DirectorRe: Rezone Application Review

General Comments:

DeKalb County Health Regulations prohibit use of on-site sewage disposal systems for:

- multiple dwellings
- food service establishments
- hotels and motels
- commercial laundries
- funeral homes
- schools
- nursing care facilities
- personal care homes with more than six (6) clients
- child or adult day care facilities with more than six (6) clients
- residential facilities containing food service establishments

If proposal will use on-site sewage disposal, please contact the Land Use Section (404) 508-7900.

Any proposal which will alter wastewater flow to an on-site sewage disposal system, must be reviewed by this office prior to construction.

DeKalb Public Health

This office must approve any proposed food service operation or swimming pool prior to starting construction.

Public health recommends the inclusion of sidewalks to continue a preexisting sidewalk network or begin a new sidewalk network. Sidewalks can provide safe and convenient pedestrian access to a community-oriented facility and access to adjacent facilities and neighborhoods.

For a public transportation route, there shall be a 5ft. sidewalk with a buffer between the sidewalk and the road. There shall be enough space next to sidewalk for bus shelter's concrete pad installation.

Since DeKalb County is classified as a Zone 1 radon county, this office recommends the use of radon resistant construction.

DeKalb Public Health

DEKALB COUNTY GOVERNMENT PLANNING DEPARTMENT DISTRIBUTION FORM

The following areas below may warrant comments from the Development Division. Please respond accordingly as the issues relate to the proposed request and the site plan enclosed as it relates to Chapter 14. You may address applicable disciplines.

1112 Z-24-1247194 2452 La Fortune Drive Recommendation: Denial.

DEVELOPMENT ANALYSIS:

• Transportation/Access/Row

Consult the DeKalb County Transportation Department prior to land development permit. Verify widths from the centerline of the roadways to the property line for possible right-of-way dedication. Improvements within the right-of-way may be required as a condition for land development application review approval. Safe pedestrian and vehicular circulation are required compliant with DeKalb street standards. Paved off-street parking is required. Sidewalk is shown in the visualization but not in the site plan.

• Storm Water Management

Compliance with the Georgia Stormwater Management Manual, DeKalb County Code of Ordinances 14-40 for Stormwater Management and Water Quality Control is required as a condition of land development permit approval. Show how runoff reduction and water quality treatment will be provided. Stormwater management under the private roadway is not recommended as system failures may restrict access to residences.

Flood Hazard Area/Wetlands

The presence of FEMA Flood Hazard Area was indicated in the County G.I.S. mapping records for the site and is noted in the plan; and should be noted in the plans at the time of any land development permit application.

Landscaping/Tree Preservation

Landscaping and tree preservation plans for any building, or parking lot must comply with DeKalb County Code of Ordinances 14-39 and are subject to approval from the County Arborist.

Tributary Buffer

State water buffer was reflected in the G.I.S. records for the site and is noted in the plan.

Typical state waters buffer requires a 75' undisturbed stream buffer and land development within the undisturbed creek buffer is prohibited without a variance per DeKalb County Code of Ordinances 14-44.1. Variances from the Zoning board of Appeal should be required for removal of impervious area in the buffers and for proposed roadway feature in the buffer.

Fire Safety

<u>Plans for land development permit must comply with Chapter 12 DeKalb County Code for fire protection and prevention.</u>

I. INTRODUCTION

This Application seeks rezoning of a largely undeveloped parcel of land on the northeast corner of LaFortune Drive and Kelly Lake Road for an eco-friendly, contemporary townhome community in the trees. The Applicant proposes to develop the +/- 3.782 acres on the north side Kelly Lake Road with a maximum of 12 townhomes (approximately 3.17 units per acre) while minimizing deforestation. The applicant proposes to offer different design models with the opportunity for custom touches. *See elevations included herein*. Amenities will include nature trails with benches, a dog park, play areas for children, and a sports zone,. Green building practices will be incorporated throughout. These include energy efficient insulation, lighting and plumbing fixtures, solar tiles, energy efficient glass packages, earth friendly building material and electric car chargers inside each dwelling. There will drive under be two-car garages and options for a roof terrace.

In order to achieve this the Subject Property needs to be rezoned from its current designation of R-75 to RSM. Along the I-20 Corridor RSM has been used as a transitional zoning designation between the Overlay and R-75. *See, e.g.,* —at Adair Trace and Mills Commons Drive; Mills Bend and Whites Ridges off Whites Mill Road; Charleston Pointe; Brighton Boulevard, Shropshire Lane, and Gates at Flat Shoals off Flat Shoals Road and more. *See attached*.

II. FACTUAL BACKGROUND

The Subject Property is currently zoned R-75 (single-family residential), a zoning district requiring, among other things, minimum lot areas of 10,000 square feet and not permitting attached single-family dwellings such as townhomes. It is located across the road from three or four large lot single family homes on Kelly Lake Road and smaller single family residential

developments along LaFortune Drive, all zoned R-75. However further to the east and south of the Subject Property are the Bolden Pines Apartments at 2784 Kelly Lake Road (zoned MR-2), an RSM zoned lot at 2772 Kelly Lake Road, and commercial strip development zoned C-1 and C-2 along Candler Road. These latter properties are all within Tier 2 of the I-20 Overlay located immediately to the southeast and east of the Subject Property. *See Overlay map*. Bolden Pines is comprised of 40 units on 3.56 acres (10.96 upa). It was built in 1965 and abuts another MR-2 zoned parcel at 2423 Candler Road developed for 90 apartments on 7.68 acres at a density of 11.7 upa. Immediately to the southeast across Kelly Lake Road from the Subject Property is a development fronting on Candler Road but with frontage on Kelly Lake Road (2537 Candler Road). It is currently being built out and known as "Tranquility @ Decatur." It has 160 rental units, is zoned MZ (multi-zone), and is in the I-20 Overlay. Immediately to the north of the Subject Property and to its west are single family homes zoned R-75, Kelly Lake Elementary School, and Whites Mill Road. *See included photos of Subject Property and its surrounds*.

The Subject Property has a number of development challenges: 1) More than one half of the property is in a special flood zone AE; 2) it is traversed on the southern one fourth by a blue line stream known as "Doleless Creek" and a branch thereof requiring 75-foot buffers on either side of the stream cover almost 2/3 of the Subject Property; 3) it is heavily wooded; 4) topography rises 20 feet on either side of the stream. It is designated as Suburban on the future land use map in the 2050 Comprehensive Land Use Plan and is located in Commission District 3. *See maps filed contemporaneously with this application*. The Applicant purchased the Subject Property in early January of 2023. Shortly after purchase, the Applicant commenced conducting due diligence with the intent of trying to develop the Subject Property for residential use. Due to the development challenges on site, the Applicant quickly rejected development of the site for a

large lot subdivision as zoned. While theoretically, development of the Subject Property as zoned could yield between 8 and 10 single-family homes, such development would require mass grading, almost total destruction of all trees on site, encroachment into the stream buffers and would not yield any profit due to the sheer expense of development. In other words, the land costs coupled with the high development costs would exceed any revenue from sales of such homes and would do so at the considerable cost of the environment and privacy of existing residents who now enjoy the canopy provided, in part, by the Subject Property. However, the clustering of attached homes on the northern 1/3 of the Subject Property would reduce development costs, minimize deforestation, and allow more than 2 acres of the site to remain as green space. The green space would serve as an amenity for the townhome community providing privacy, serenity, passive recreational trails, a community garden, and gathering spaces. The Applicant's plan would preserve slopes 1 and vegetation as much as possible while at the same time providing eco-sensitive homes in a park like setting for future residents. The homes will be contemporary in design, 25 feet wide and 45 feet deep, a minimum of 2000 square feet, with high-end finishes and materials. Green building techniques will be used throughout including energy efficient insulation, lighting, and plumbing, earth friendly building materials, electric car chargers, energy efficient glass packages and solar hook ups. It is anticipated that they would initially be marketed at \$475,000 +. The community would be gated and restrictions would be placed on rentals of units in the HOA documents. See enclosed site plan.

The Applicant offers this Letter of Intent along with supporting documentation including a survey, a conceptual site plan, sample elevations, various County maps, photographs of the Subject Property and its surrounds, and more. The Applicant submits that the application

-

¹ Slopes will need to be disturbed for the townhome pads but the slopes otherwise will be used to manage elevations differences wherever possible.

information and the material herein demonstrate that the application meets the standards for rezoning set forth in the Zoning Ordinance addressed in more detail below.

II. RELEVANT ZONING ORDINANCE PROVISIONS

Sections 7.3.5 of the Zoning Ordinance sets forth "standards and factors governing review" of rezoning applications by decision makers. Those factors and standards are as follows:

- A. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan.
- B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property or properties.
- C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.
- D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property or properties.
- E. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.
- F. Whether the zoning proposal will adversely affect historic buildings, sites, districts, or archaeological resources.
- G. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.
- H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources.

The Applicant submits that, as required, it can satisfactorily address all of these factors and standards and addresses them in detail below.

III. ZONING FACTORS/STANDARDS ANALYSIS

A. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan.

The Subject Property is designated in the 2050 Comprehensive Land Use Plan ("LUP") for "Suburban" land use. This designation is for neighborhoods that have developed in traditional suburban land use patterns. Future development in these areas "should provide better pedestrian and community connectivity and be designed in a way that preserves and enhances existing green space. This designation allows for detached single-family homes, townhomes, cottages, conservation villages and hamlets of up to 8 units per acre. *See 2050 Comprehensive Land Use Plan, page 41*

One of the articulated listed "opportunities" of the LUP to resolve the issue of preserving open space and critical environmental areas is stated as "Development that combines land conservation with clustered development provides an opportunity to encourage growth while preserving the limited remaining greenspace. ". See 2050 Comprehensive Land Use Plan, page 6. Goals articulated within the LUP include:

- **Preservation**-encourage the preservation of the County's limited remaining open space, farmland, natural and critical environmental areas.
- Environmental Sensitivity-protect environmentally sensitive areas including wetlands, floodplains, water supply watersheds and stream corridors.
- **Sustainable Zoning**-utilize zoning tools and techniques that preserve open space, natural resources and the environment and address resiliency.
- Sustainable and Conservation Development-promote development that incorporates sustainable practices and conserves critical environmental areas.

See 2050 Comprehensive Land Use Plan Update, page 6.

Housing opportunities note that "new and diverse housing types will help the County meet market demands and support continued growth." *See 2050 Comprehensive Land Use Plan, page 8.*

The zoning proposal is not only in conformity with the policies and intent of the Suburban Character Area but many of its elements further the goals set forth in the Comprehensive Land Use Plan. The density does not exceed eight units per acre (it is at 3.17 units per acre); the Applicants propose a mixture of contemporary housing quite different from each other and those in the immediate vicinity, thereby offering a diversity. Three bedroom and four-bedroom models will be offered. Moreover, the zoning proposal provides for these units to be surrounded by trees, greenspace, and community spaces. The community created will be walkable and connected with walking trails. The site plan proposed is designed to promote the building of a strong community identity. Sidewalks will be provided along the frontage of Kelly Lake Road and La Fortune Drive; approximately 2 acres of green space will be saved and utilized for passive recreation and enjoyment; the homes will be clustered so as to avoid encroachment into any stream buffers and flood plain; See site plan. Green building techniques will be incorporated throughout the development thereby promoting environmental sustainability and resilience. See enclosed Powerpoint presented to the community during pre-submittal meeting on August 19. 2024.

B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property or properties.

The proposed townhome community is clearly suitable in view of the use and development of adjacent and nearby property. The adjacent properties are all zoned for residential use—medium or low-density residential zonings. The density of the proposed development is a modest

3.17 units per acre. This density is consistent with the developed adjacent properties where lots are on the average about 1/3 acre or developed at 2.5 to 3 units per acre². Aside from parcels owned by the elementary school and churches in the area, the Subject Property is one of the largest R-75 lots, if not the largest, in the R-75 zoned area. Because of the preserved tree canopy and proposed street tree planting along LaFortune Drive, the townhome community will be largely hidden in the trees, not visible from the streets, and fully compatible with its surrounds. Moreover, the grade change and the distance from nearby residences and the active areas of the community will serve further to buffer views of the community from adjoining properties.

C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.

Due to the extreme topography, the considerable number of trees, stream buffering, and flood plain requirements development costs for development of the Subject Property would likely exceed any potential profit from marketing as large lot single family residential.

Moreover, developing as is would likely result in mass grading and destruction of the tree canopy, which is something the Applicants wish to avoid. As noted above, while theoretically, development of the Subject Property as zoned could yield between 8 and 10 single-family homes, such development would require mass grading, almost total destruction of all trees on site, encroachment into the stream buffers and would not yield any profit due to the sheer expense of development. In other words, the land costs coupled with the high development costs would exceed any revenue from sales of such homes and would do so at the considerable cost of the environment and privacy of existing residents who now enjoy the canopy provided, in part,

 $^{^2}$ There are a few larger lots on the east sides of LaFortune but the average lot in the nearby community is 75 x 150 or 11, 250 square feet. Cul de sac lots are generally smaller.

by the Subject Property. At most two homes could be developed on the lot without intrusion into the buffers or flood plains, however, such a project would not yield a profit. As such, Applicant submits that there is no reasonable economic use as zoned when compared to similarly situated properties within the same zoning classification.

D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property or properties.

The proposed development provides for a 20-foot transitional buffer to the north and east where it directly adjoins single family residential properties. It provides for preservation of more than two acres of natural greens space with a mature tree canopy, stream buffers and flood plain. It provides for the planting of street trees along both the Kelly Lake Road and LaFortune Drive frontages. These characteristics provide for large separation between the proposed townhome community and the existing adjoining properties. For example, the closest residence is at 2428 LaFortune Drive. It will be separated from the row of townhomes by approximately 50 feet due to the separation of the residence from its property line, the 20-foot transitional buffer, and additional setback to the rear of the townhome community. The residence at 2744 Kelly Lake Road will be separated from the closest point of the townhome community proposed by more than 150 feet, whereas 2732 Kelly Lake Road will be separated from the closest point of the townhome community by at least 100 feet. The topographic differences will further increase the sense of separation and serve to protect existing neighbors' privacy and quiet enjoyment of their property. There will be no significant adverse effects on the existing use or usability of adjacent properties.

Residents in opposition to the proposed rezoning expressed, among other matters, concerns regarding rental of future units and security. The Applicants are willing to agree to a condition of zoning to include in the CCRs for the townhome community provisions which would limit the number of rentals at any given time to no more than a total of two (2) units, to prohibit short term/vacation rentals; to require a minimum of a 12 month lease and to require that owners provide evidence of background check, credit check and required security deposit to the HOA Governing Board. This is significantly more than any rental controls in the surrounding communities. The Applicant also proposes to gate the community for security purposes. It is agreeable to having this be a condition of any zoning approval.

E. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.

As noted above, the property immediately to the southeast of the Subject Property is being developed for a 160-unit apartment complex. It and other properties fronting Candler Road are in the I-20 Overlay, an Overlay with considerably more density allowed than in the older residential subdivisions to its west. Housing options for single family homes are needed in the County. Residents, according to the 2050 Comprehensive Land Use Plan want more housing choices; they want to attract younger families and professionals and increase the diversity of housing options. The townhomes proposed by the Applicant do this—the only other options offered in the immediate vicinity are large lot aging single family detached homes. While lovely, this type of housing is not for everybody. The proposed development helps meet the needs of home buyers looking for alternatives to the high maintenance large lot

subdivisions available throughout this community. The proposed development allows buyers to secure eco-friendly sustainable housing close to services and amenities.

Moreover, along the I-20 Corridor RSM has been used as a transitional zoning designation between the Overlay and R-75. *See, e.g.,* —at Adair Trace and Mills Commons Drive; Mills Bend and Whites Ridges off Whites Mill Road; Charleston Pointe; Brighton Boulevard, Shropshire Lane, and Gates at Flat Shoals off Flat Shoals Road and more. *See attached*. Given the intensity of the uses and likely future uses along Candler Road proximate to the Subject Property, utilization of the RSM zoning category to provide for sensible transition from Candler Road to the large lot communities to the west provides for protection of these older communities.

F. Whether the zoning proposal will adversely affect historic buildings, sites, districts, or archaeological resources.

Applicant is not aware of any historic buildings, sites, districts or archaeological resources in the vicinity of the Subject Property.

G. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

A traffic study is not required for such a small community. However, using the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th edition 2021, for Single-Family Attached Housing (LUC 215), it is estimated that Daily vehicle trips for this 123 unit community would generate a maximum of That study was submitted by Applicants to the Community Development Department and is included with the materials herein. The traffic engineer determined, among other things, that the proposed project would generate an estimated 77 vehicle trips per day with between 4 and 6 vehicle trips at peak a.m. and p.m.

hours. The contribution of trips to the adjoining roadways will be minimal and will not necessitate any road improvements.

Public sewer is available at the Subject Property through a DeKalb County line running down Kelly Lake Road. Water is provided by DeKalb County. The DeKalb County schools serving the Subject Property are Kelly Lake Elementary School, McNair Middle School and McNair Highschool. This project should not generate (using standard school planning numbers generate more than 2 or 3 additional students at each level. The townhomes proposed will be 3 to 4 bedrooms and between 2000 and 2800 square feet. The marketing will be largely to young professionals with and without children and to couples who work at home. But even if all homes are occupied by families with children, the development will not impose an excessive burden on the schools. All of these schools, according to the DeKalb County Schools enrollment and capacity statistics at https://www.dekalbschoolsga.org/operations/planning/ are under capacity. Kelly Lake ES has a capacity of 480 students with only 228 enrolled; McNair MS has a capacity of 1200 with only 795 enrolled; and McNair HS has capacity of 1674 with only 782 enrolled.

H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources.

The zoning proposal will not be adverse to the environment or surrounding natural resources. While there are stream buffers and flood plain, none of these areas will be disturbed or developed pursuant to the Applicant's plan. At least two acres of the subject property will be undisturbed, leaving the environment and its natural resources untouched. The clustering of townhomes on the north side of the Subject Property allows for the development of an

environmentally sustainable and sensitive community. Moreover, the Applicant is taking careful steps to incorporate green building elements throughout the community to lessen environmental impacts such as solar roof tiles, electrical car chargers, earth friendly building materials, glass packages, and energy efficient insulation, lighting, and plumbing fixtures. The entire impetus and implementation of this proposed community is to provide for an ecofriendly community "in the trees."

V. CONCLUSION

Based on the foregoing, the Applicant respectfully request that the Board of Commissioners approve rezoning of the Subject Property from R-75 to RSM to allow for the Applicant's proposed 12-unit townhome with the following conditions:

- 1) The building elevations shall vary in style and design composed of brick stone or stucco or any combination thereof. The corner units shall be brick. The building elevations shall be staggered to have articulation throughout. No two buildings shall have the same architectural design.
 - 2) The townhome community shall be gated.
- 3) No more than 2 of the units shall be rented out and no such rentals may be for less than a period of one year.
- 4) Any rentals must be approved by an HOA to be established for the community and shall not be approved until criminal and financial background checks have been provided by the owner to the HOA governing body.
- 5) Development of the Subject Property shall be in substantial conformity with the site plan submitted with the zoning application.

The Applicant attended a pre-application meeting. *Form enclosed*. Applicant also conducted a community pre-submittal meeting on August 19, 2024, via Zoom. *See included recording, chat record and notices to community*. The Applicant is amendable to additional reasonable conditions proposed through these community meetings or by staff should further conditions be requested.

Respectfully submitted this 26th day of August, 2024.

Linda Dunlavy

Linda I. Dunlavy Georgia Bar No. 339596 Attorney for Applicant DUNLAVY LAW GROUP, LLC

CONSTITUTIONAL OBJECTIONS

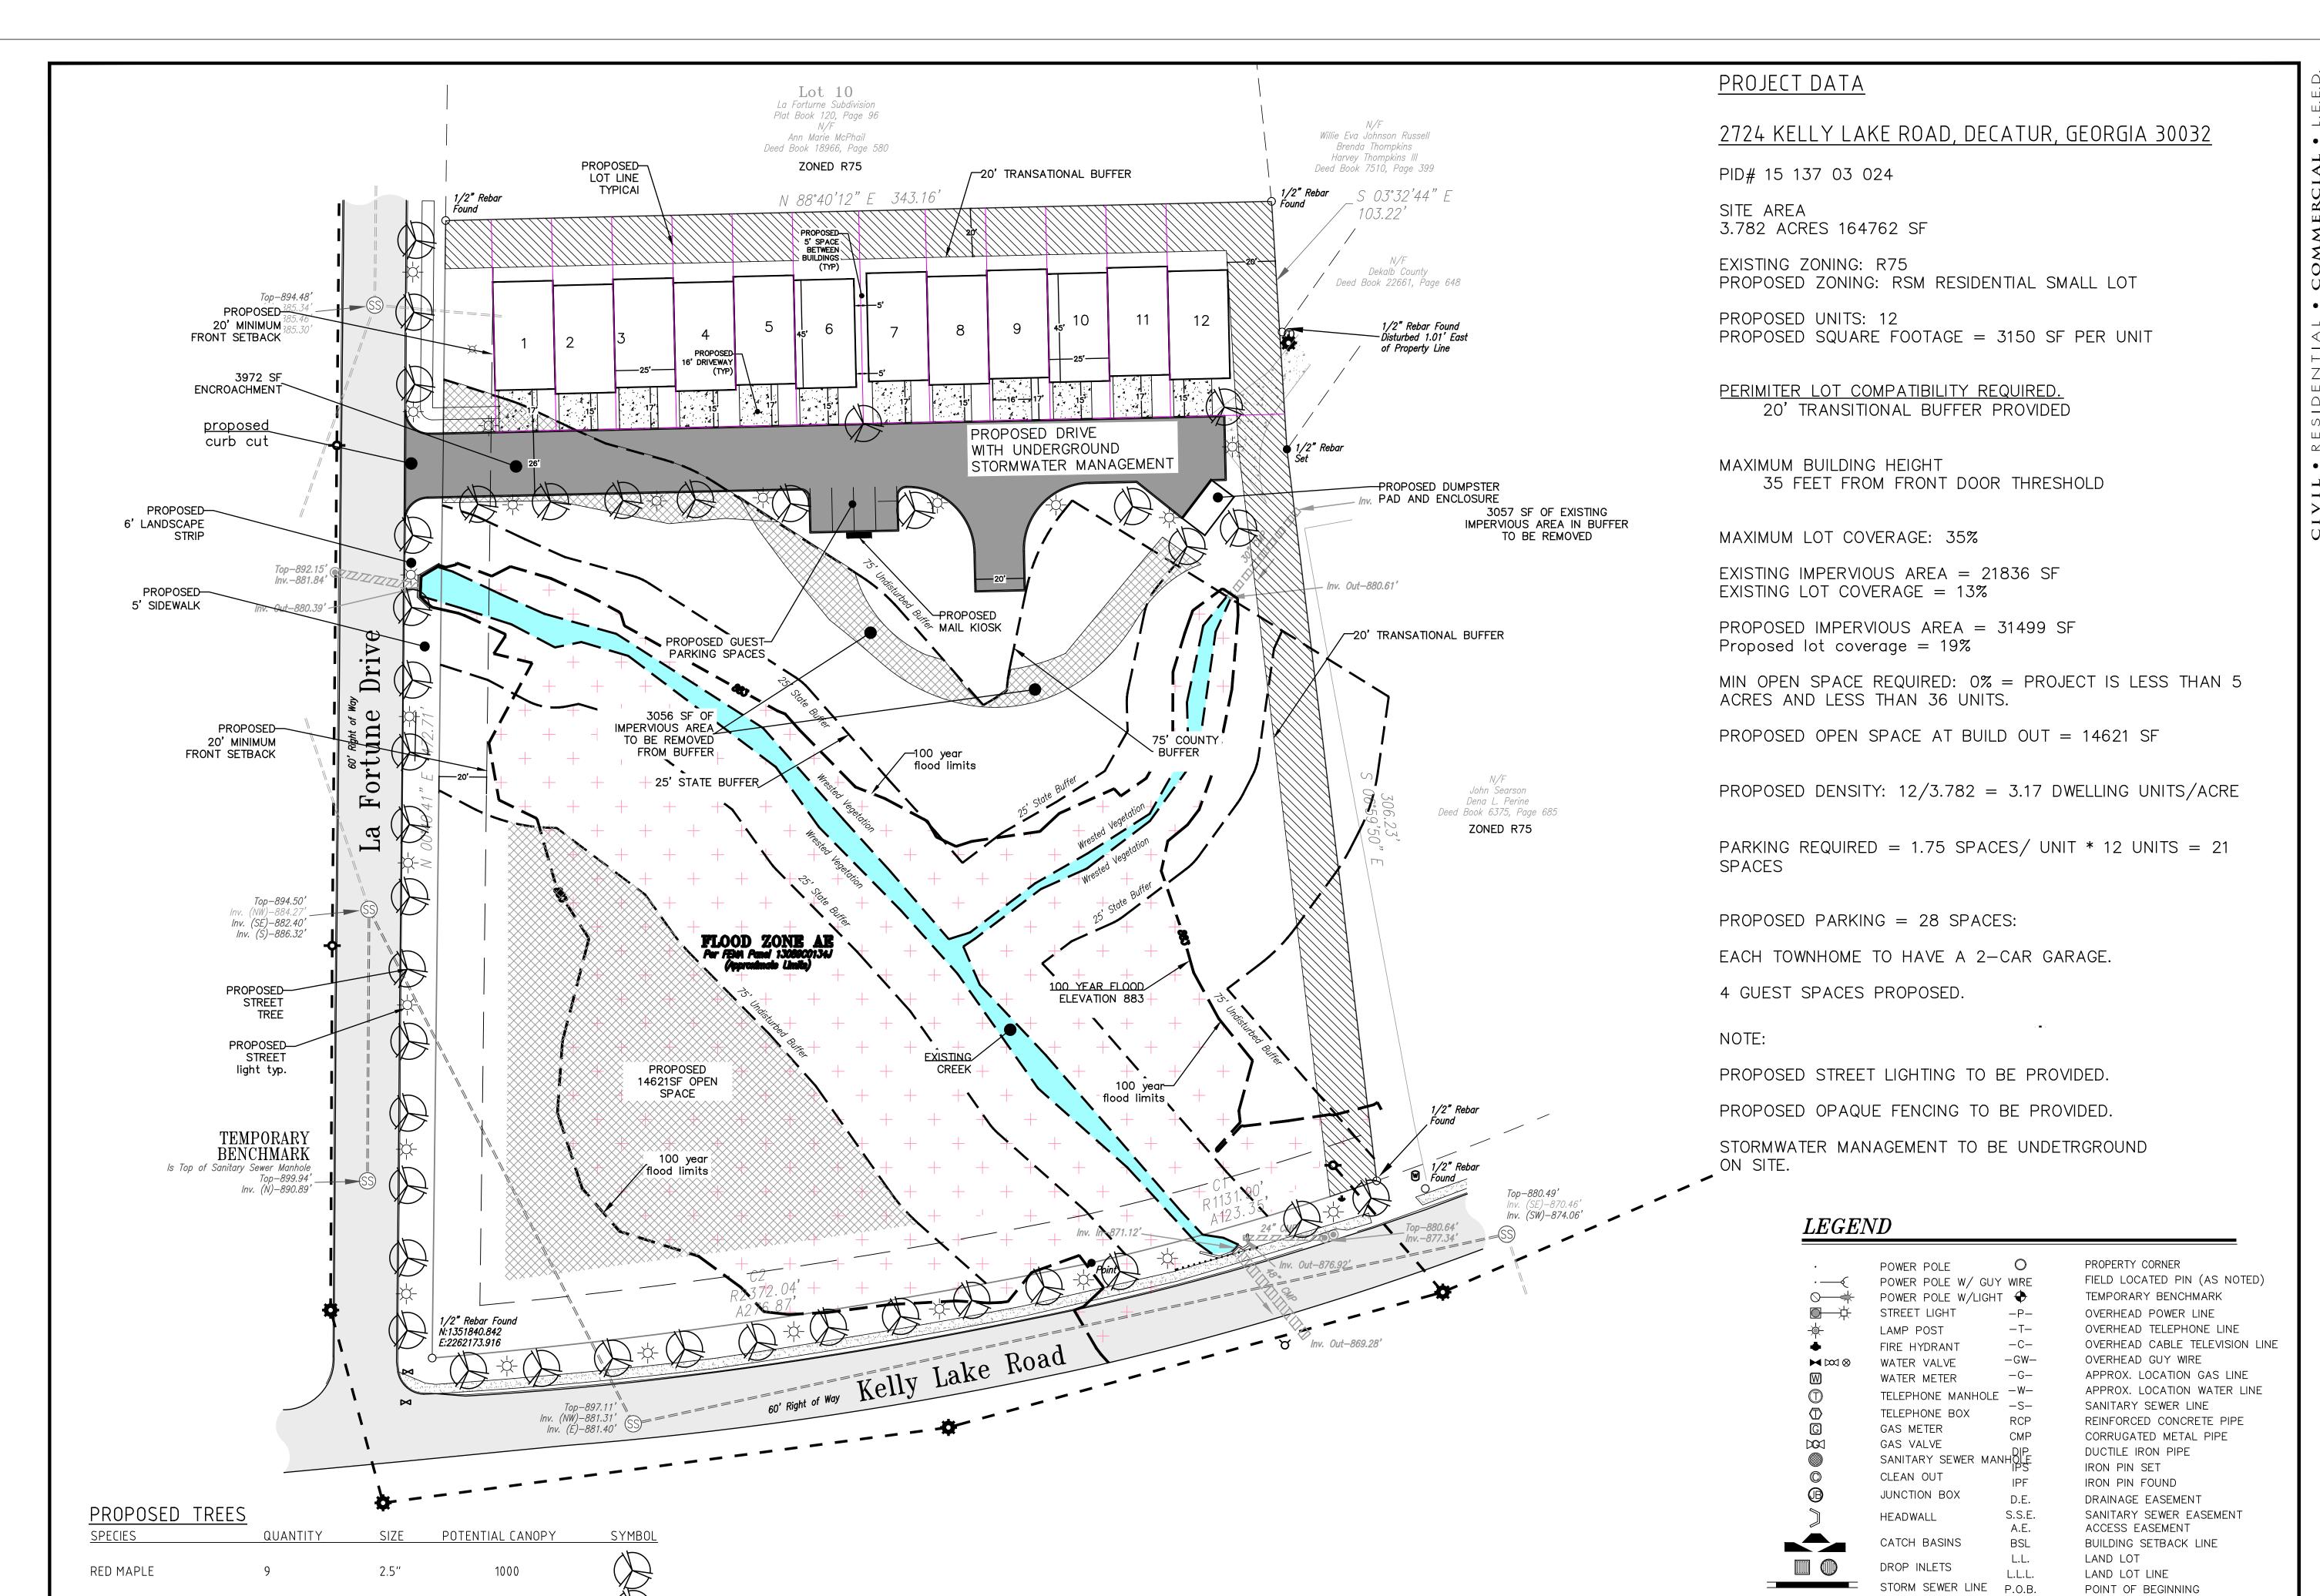

The Applicant of the Subject Property respectfully submits that any decision of the Board of Commissioners which would preclude the rezoning of this property from R-75 (Single Family Dwelling District) to RSM (Residential Small Lot Mix District) to allow for the development of the 12-unit townhome community proposed is unconstitutional as a taking of property, a denial of equal protection, an arbitrary and capricious act, and an unlawful delegation of authority in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia and the Due Process Clause of the Fourteenth Amendment of the United States Constitution and the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States.

Further, an attempt by the Board of Commissioners to impose greater restrictions upon the manner in which the property will be developed than presently exist in the Code of Ordinances, such as by way of approving the Rezoning Applications, but conditioning said approval in such a way that the proposed number of units could not be developed, would be equally unlawful. Such conditioning or restrictions would constitute an arbitrary and unreasonable use of the power

delegated to the Board because they could bear no substantial relation to the public health, safety, morality, or general welfare of the public and would substantially harm the Property Owner and deprive it of reasonable, investment backed expectations based upon the current Codes of the County. Finally, any use of the power delegated to DeKalb County to deny the Rezoning applications or condition it would be a manifest abuse of its discretion.

Finally, the failure to rezone the Subject Property would result in the taking of property without just and adequate compensation or due process of law in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph I (a) of the Constitution of the State of Georgia and the Due Process Clause of the Fourteenth Amendment of the United States Constitution.

RE: Parcel ID 15-137-03-024 - 2724 Kelly Lake Road aka 2452 LaFortune Drive Application to Rezone Property to RSM (Small Lot Residential Mix)

Dear Property Owner:

We invite you to join our Zoom video meeting on Monday, August 19, at 7:00 p.m. to discuss a proposed rezoning to RSM (Small Lot Residential Mix) for the property located at 2724 Kelly Lake Road (also known as 2452 LaFortune Drive). Our client, Anaga, LLC, is seeking this rezoning to allow for the development of twelve (12) fee simple townhomes.

Below are the meeting instructions. There are multiple ways for you to join the meeting, including via your computer, tablet, or cell phone, with or without video.

Linda Dunlavy-Attorney is inviting you to a scheduled Zoom meeting.

Join Zoom Meeting https://us02web.zoom.us/j/88976573006?pwd=s4KD9GO4tzyDpkdBg5a9r6DIpNZbDK.1

Meeting ID: 889 7657 3006 Passcode: 486746

One tap mobile +16465588656,,88976573006#,,,,*486746# US (New York) +16469313860,,88976573006#,,,,*486746# US

Please feel free to contact me if you have any questions.

Sincerely, **DUNLAVY LAW GROUP, LLC**

/s/ Línda I. Dunlavy

Neighbor	Contact Details	Question
Evan and Katherine Horne	2415 LaFortune Dr	
Jon Markham	2917 Katherine Valley	Does the proposed zoning exist anywhere on Kelly Lake or in the neighborhood currently?
Gary and Judy DuMont		
Margaret R Jackson	2427 LaFortune Dr Decatur, GA 30032 Jacksongcarr1922@gmail.com 404-427-2289	
Keith Owens	2732 and 2752 Kelly Lake Road	How will it affect the adjoining properties of 2732 and 2752?
Anawah Reuven	Kelly Lake Rd	One HOME to One PROPERTY/LAND-LOT. The creek-bed of Doless Creek (which this project is on top of and directly buttresses) is horribly/horrendously eroded and the the street-drain floods EVERY time there is rain/heavy rain on KELLY LAKE ROAD. This project Will directly ADVERSELY impact DOLESS CREEK and KELLY LAKE ROAD. Residents and Neighbors are walking in the street where this limb, from this property, is fallen on the narrow KELLY LAKE ROAD sidewalk, this has been like this for over a week Will there be a tear down of the existing home that is on the property?
Carl and Sarial Jaffar	2603 Yale Terrace Decatur, GA 30032 Carl.jaffar@gmail.com	
Ellen K		How will the stream be affected?
Faye Lyons-Gary	Flyons gary@hotmail.com 2267 Whites Mill Road	
Stephen Conover	2775 Augusta Way Decatur, GA 30032 conover@gmail.com

SOLE AT KELLY LAKE

Modern Townhome Community

Living in the trees

About Us

We are a small family owned and operated company with a health-conscious, community-focused approach. We care about providing the highest quality product while also promoting the health and well being of the community and environment. We belive you can live and work in harmony with nature.

Anastasiya Lead Developer/ Designer

Anthony
Director of
Operations

Cameron

Realestate Agent/ Director of Community Relations

Our Strategy

Community Centered

Support the community needs and create opportunities for connection, safety, and peace

Nature Integrated

Integrate nature with residential development and inspire others to do same.

Alignment

aligning with modern living, healthy lifestyle, lower property maintenance, environment conscious and acres of green space.

Conscious Building

Use health-conscious and environmentally-conscious building practices.

Our Sole Objectives

Green Development

Limit deforestation and bring green development and building practices to DeKalb County

Healthy Living

Promote a healthy lifestyle built into the infrastructure of the community.

Modern Beauty

Merge modern esthetic and amenities with the natural beauty of the forest.

Anchor Community

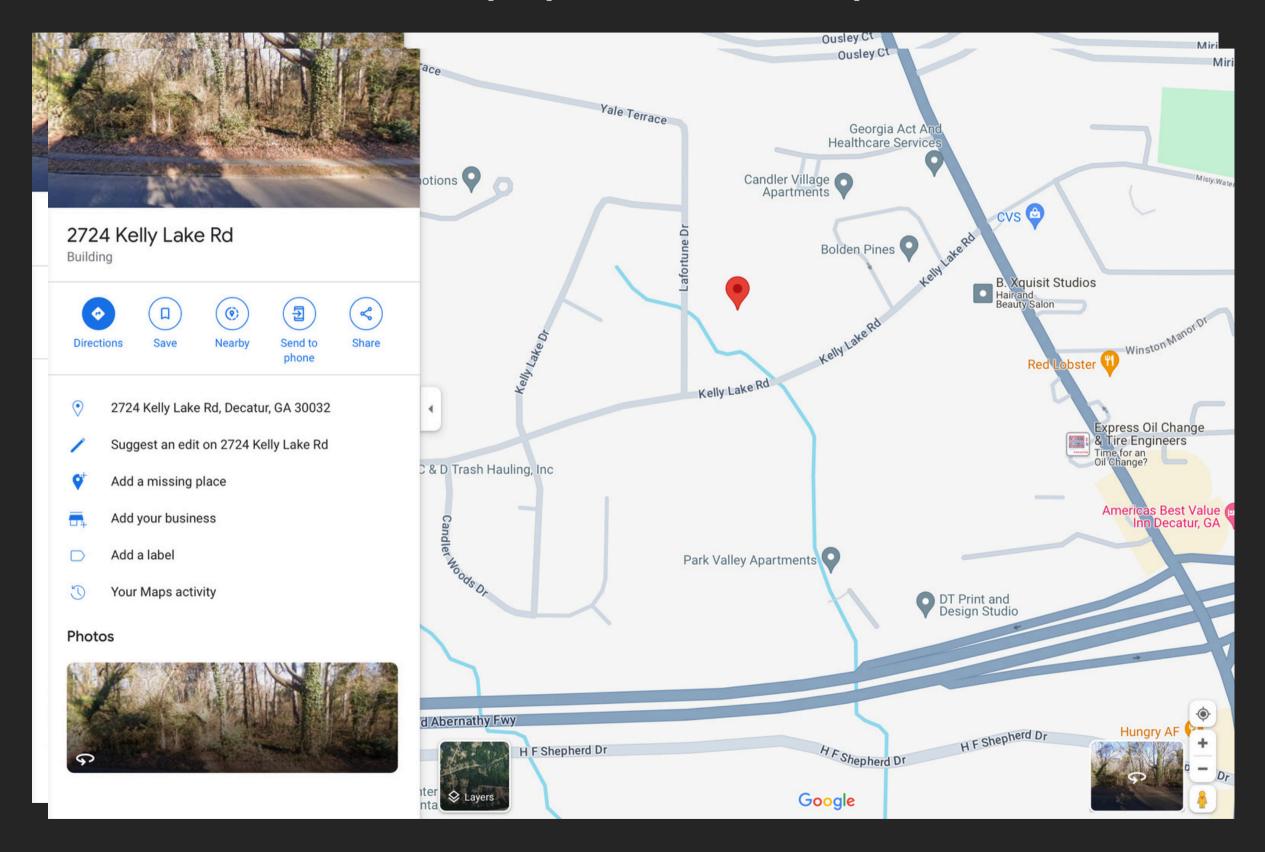

Create a community where the residents will want to anchor in and build roots.

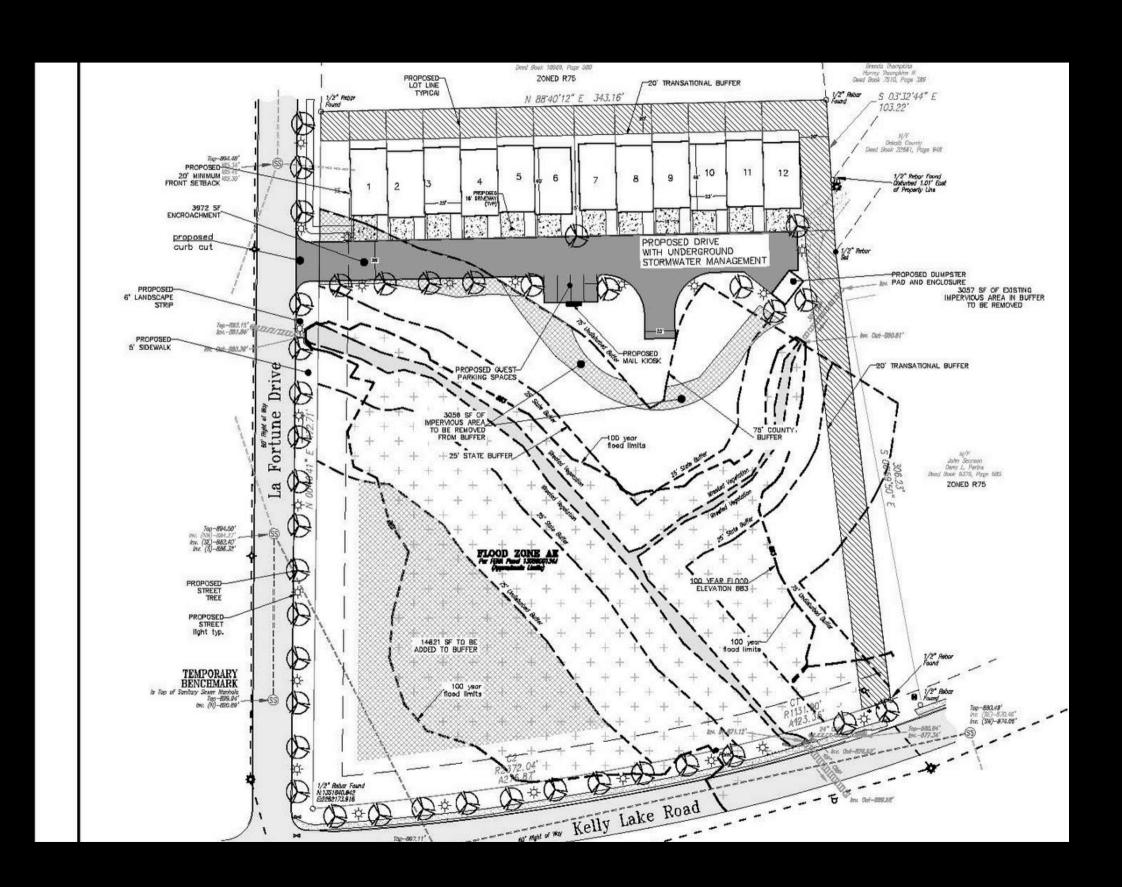

- 12 visually stunning attached homes -3&4 Beds
 +3 1/2 Baths +2 Car Garage + Rooftop Living
 Space
- 3.8 acres of private land
- over 2 acres of undisturbed trees and a cree providing privacy and serenity
- Community garden, benches, a dog park land trails

Location of proposed Sole Development

PROPOSED SITE PLAN

Concept Model

Amenities

 Nature trails with benches and rest areas throughout the property

• Dog park, picnic areas, playground

• Bike racks, walk/bike paths, sports zone

Gated community

 Energy Efficient Insulation, lighting, plumbing fixtures and more

• Energy Efficient Glass Packages

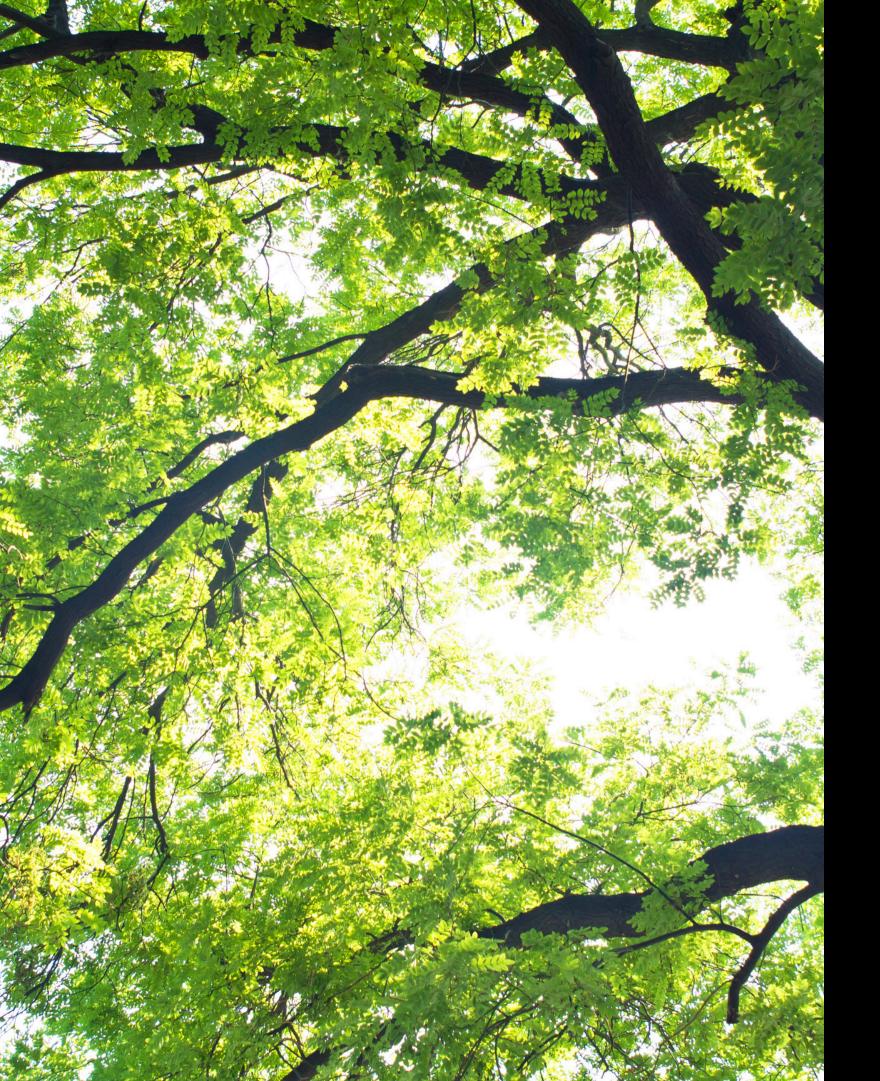

Use of Earth Friendly Building Materials

Electric car chargers for each dwelling

Solar Hookups and more

Innovative Gutter systems

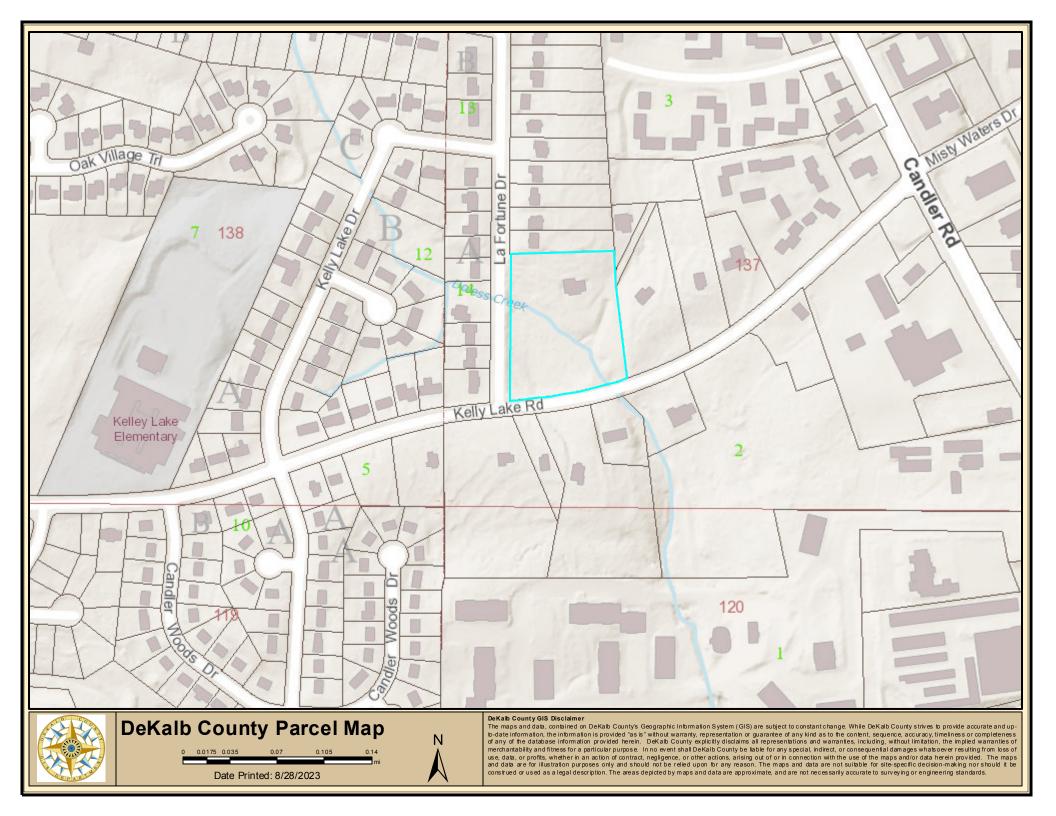

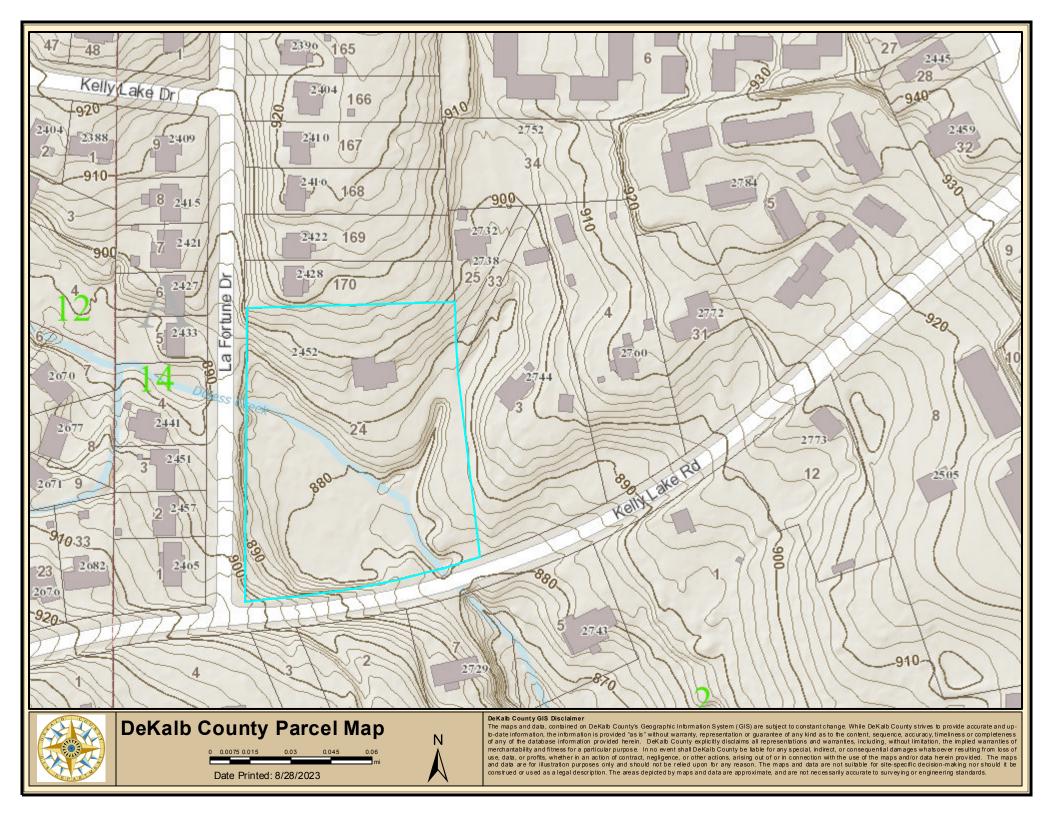

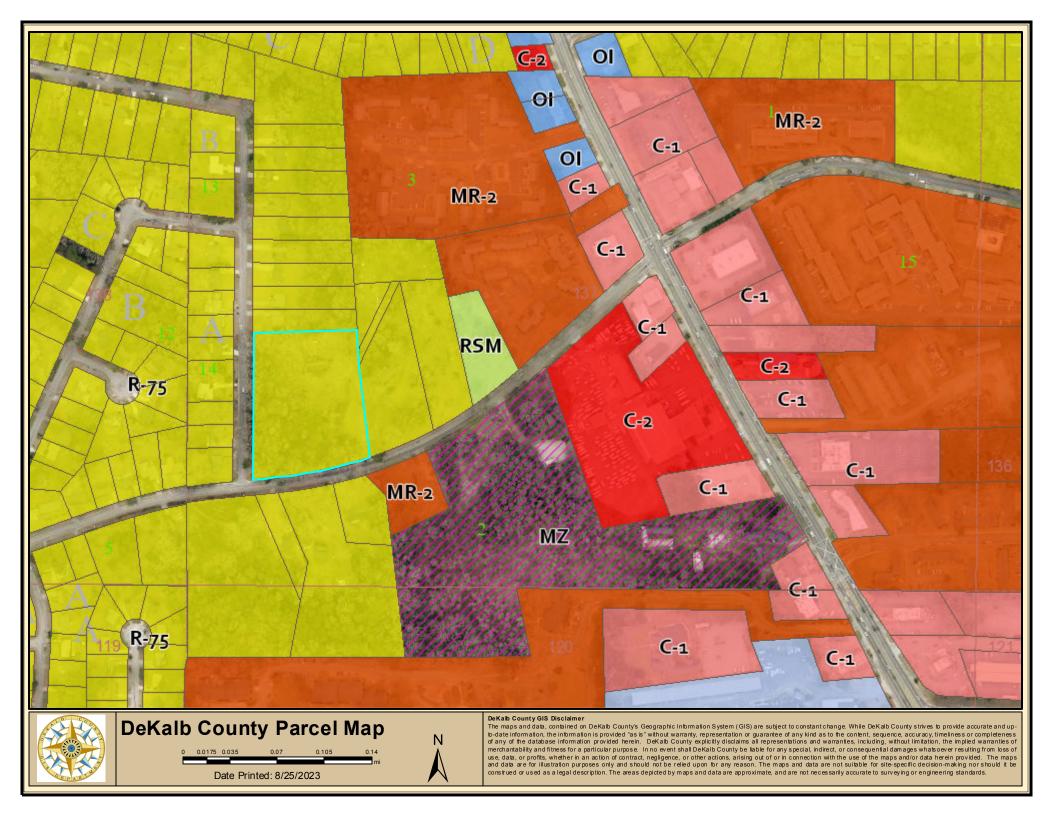

SOLE AT EAST POINT Living in the trees

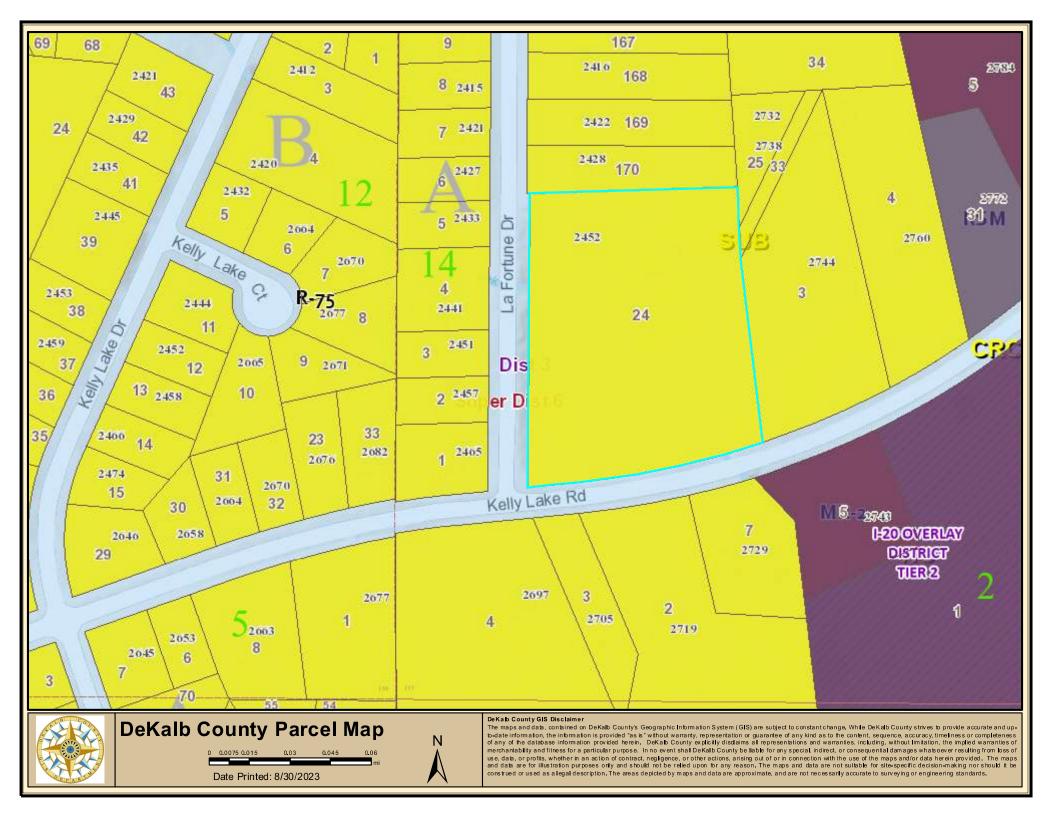

Innovative project created with good intentions, ingenuity, and passion.

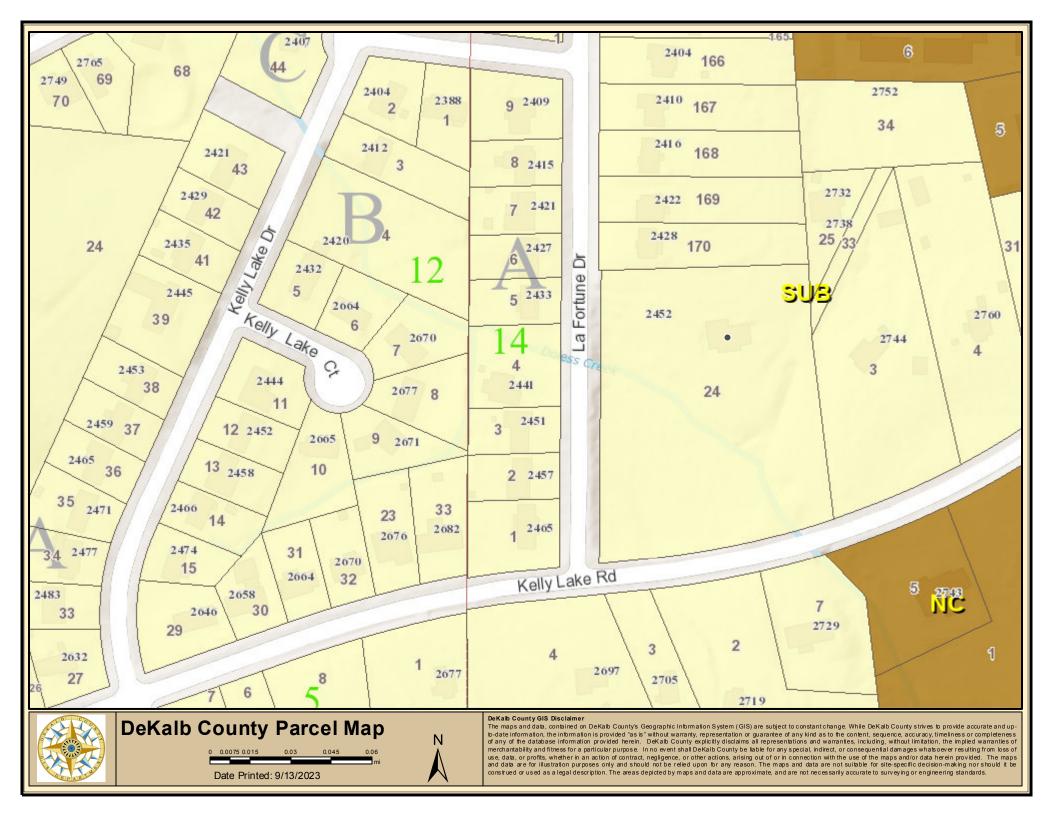

We ask for your support to create a better future together.

Candler Village Apartments

2425 Candler Rd, Decatur, GA 30032

Southeast DeKalb

About Candler Village

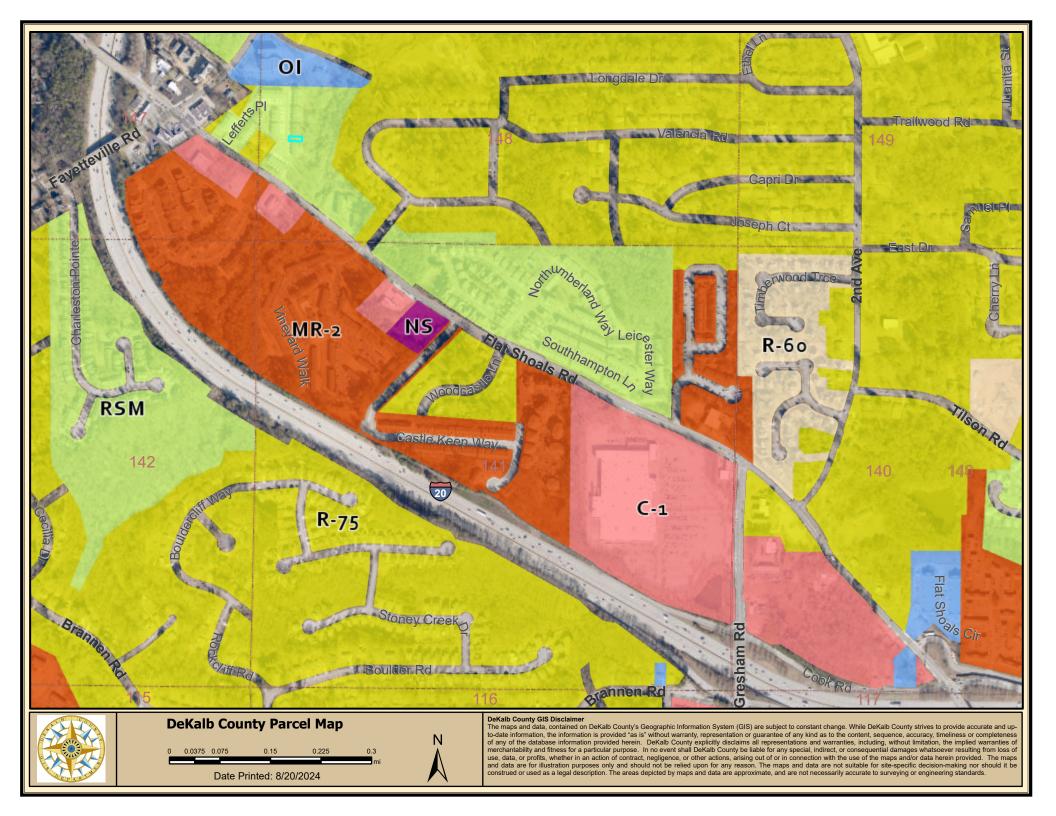

Candler Village is a pet and family-friendly community in Decatur, Georgia with one, two, and three-bedroom apartment home options to suit your needs. Our apartments feature patios, balconies, and central heating and air conditioning, and select units include upgraded features such as modern, soft-close cabinetry, quartz countertops, stainless steel appliances, and plank-style flooring. We also have convenient amenities for our residents to enjoy, including a swimming pool, playground, basketball court, and laundry facilities. Candler Village offers comfort, enjoyment, and a convenient location just minutes from downtown Atlanta, local restaurants, shopping destinations, and beautiful parks.

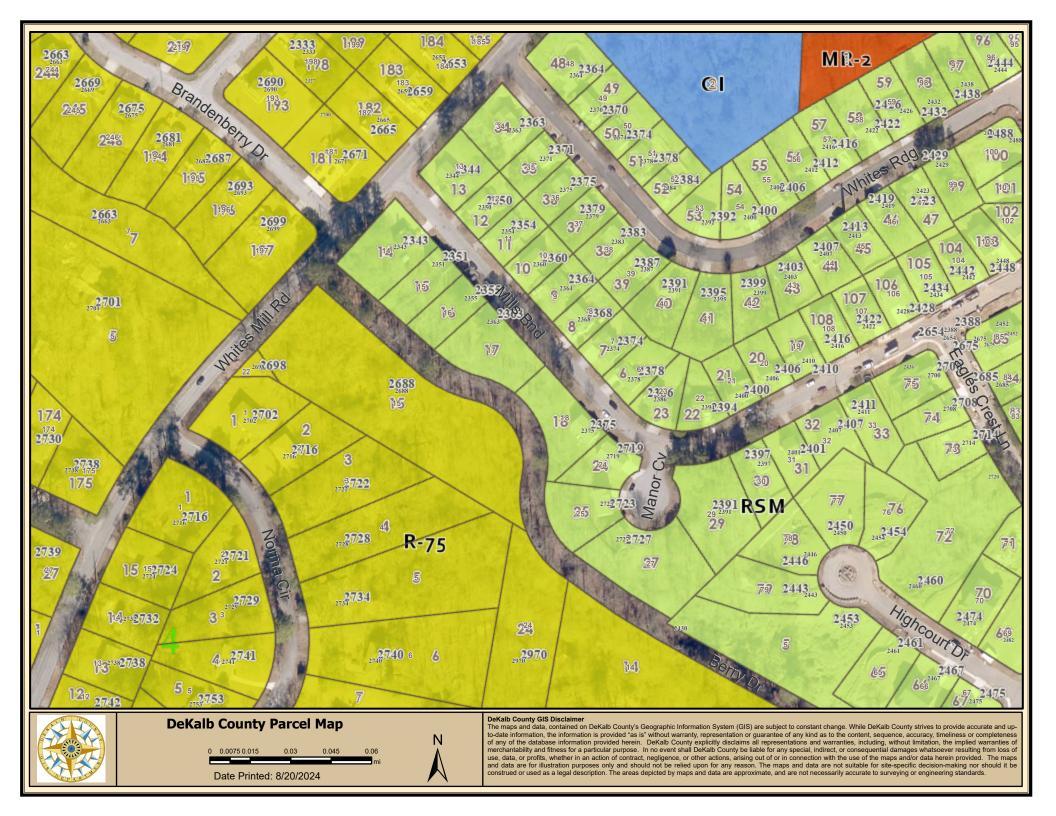

Candler Village is located in Decatur, Georgia in the 30032 zip code. This apartment community was built in 1964 and has 2 stories with 90 units.

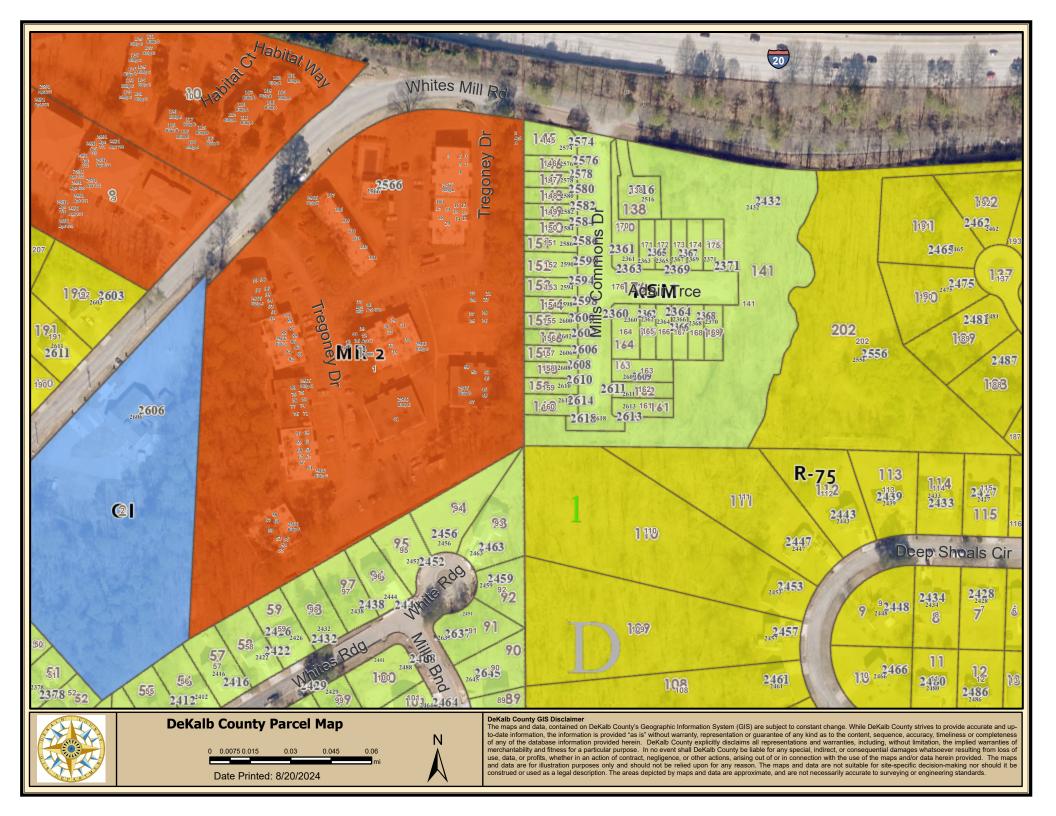

Special Features

Access to Public Transportation

Community Features

Goals	S
-------	---

Preservation

Encourage the preservation of the County's limited remaining open space, farmland, natural and critical environmental areas.

Environmental Sensitivity

Protect environmentally sensitive areas including wetlands, floodplains, water supply watersheds and stream corridors.

Develop more Neighborhood Parks

Increase the number of parks within neighborhoods that are easily accessible to nearby residents.

Acquisition of Open Space

Continue coordination with Recreation, Parks & Cultural Affairs to facilitate open-space acquisition and expansion

Sustainable Zoning

Utilize zoning tools and techniques that preserve open space, natural resources and the environment, and address resiliency.

Private Partnerships

Partner with nongovernmental organizations to acquire and protect land.

Sustainable and Conservation Development

Promote development that incorporates sustainable practices and conserves critical environmental areas.

Stormwater Management

Encourage techniques to reduce storm water runoff and other drainage issues as part of development activities.

Education

Educate the development community and the public on strategies and solutions for addressing water and sewer capacity concerns within the County.

Vision

Develop a unified vision and strategy for sustainability related initiatives within DeKalb County.

NATURAL RESOURCES AND SUSTAINABILITY

Issues

- ► The amount of remaining, undeveloped land and natural greenspace within the County is decreasing.
- The county needs to preserve open space and its critical environmental areas.
- Some neighborhoods desire more small and local park/greenspace options.
- Adequate maintenance of County parks and greenspace is a concern for many residents and stakeholders.
- Residents in some parts of the county have raised concerns over stormwater runoff and sewer capacity problems as more intense developments have increased around their neighborhoods.
- Non-point source pollution and stormwater runoff are major concerns.
- For many years, the County's water and sewer availability have been unknown, creating uncertainty around current and future development needs.
- While the County has policies and programs related to sustainability, there is no unified vision or strategy.

Figure 4: Median breaks allow stormwater to drain while reducing water velocity

Opportunities

- DeKalb County has a greenspace program that, coupled with private development and other stakeholders, could protect some of the County's remaining undeveloped greenspace.
- The county is dedicated to using Best Management Practices (BMP) to reduce the impact of stormwater runoff and non-point source pollution.
- The County has recently developed a plan and a strategy for dealing with previous uncertainty around water and sewer availability.
- The County currently is designated as a bronze level ARC Green Community.
- Development that combines land conservation with clustered development provides an opportunity to encourage growth while preserving the limited remaining greenspace.

Figure 5: Keswick Park in Chamblee is connected to a community trail system and accessible from nearby development

Figure 6: Westside Park in Atlanta is an example of strategic infrastrcuture investment, serving as both a recreational facility and an emergency water reservoir for the community

HOUSING

issues

- The location of affordable housing is often away from major amenities, employment centers and high-income neighborhoods.
- Many subdivisions built over the last 30 years are in need of increased upkeep, maintenance or rehabilitation.
- The existing housing stock may not be meeting the demands of the current market, or current and future residents.
- DeKalb is in need of additional market rate housing.
- With increased infill development, there is added development pressure near existing, stable single-family neighborhoods.

Figure 7: Affordable Housing should be high quality, and located throughout the county

Figure 8: Zero-lot line housing can increase FAR and units closer to development nodes, increasing the housing supply

Opportunities

- DeKalb has proximity to downtown Atlanta and many growing in-town neighborhoods.
- ► FAR and housing types are increasing within some new developments allowing for more housing options.
- New and diverse housing types will help the County meet market demands and support continued growth.
- Areas of existing, naturally occurring affordable housing present a unique opportunity to preserve affordability within the County.
- Clearly stated policies on transitions and buffers between areas of higher and lower intensity can provide guidelines that address concerns and set better expectations.

Figure 9: Older homes in established neighborhoods offer more affordable quality housing options for residents, compared to new construction

Identifying Features

- Detached Single-Family
- ▶ Townhomes
- ▶ Retail
- Institutional
- Assisted Living Facilities
- Parks and Related
- Health Care
- ▶ Civic
- Cottages
- Conservation Villages and Hamlets

Description

The intent of the Suburban Character Area is to recognize those areas of the county that have developed in traditional suburban land use patterns while encouraging new development to have increased connectivity and accessibility. These areas include those developed (built out) and those under development pressures. These areas are characterized by low pedestrian orientation, limited transit access, scattered civic buildings and curvilinear street patterns. Future development should provide better pedestrian and community connectivity and be designed in a way that preserves and enhances existing greenspace. The proposed density for areas of this type is up to 8 dwelling units per acre.

Land Use Compatibility

Permit small scale infill such as cottage court development, accessory housing units, small-scale infill and other innovative housing types to increase housing choice and income diversity without significantly altering established neighborhood development patterns.

Buffers

In areas adjacent to Activity Centers, require the transition from higher to lower densities to occur within Activity Center

Development

Create community and neighborhood focal points through the use of existing commercial areas or public parks, or by locating new parks or public squares, schools, community centers, or well-designed small commercial centers at suitable locations within walking distance of residences.

Mixed-Use and Non-Residential

Allow limited non-residential development, such small mixed-use developments outside of existing, stable single-family neighborhoods, particularly in locations with high levels of pedestrian connectivity, to meet the needs of surrounding residents.

Streetscapes & The Public Realm

Create an enhanced sense-of-place by using design principles that promote good streetscapes and a strong public realm.

Multimodal Connectivity

Enhance connectivity by providing pedestrian and bicycle infrastructure, high levels of street connectivity, multiple site access points, and connections between adjacent subdivisions, properties, and retail/commercial development.

Parking and Access

Where appropriate, require new streets to connect to adjacent street networks or developments and minimize or prohibit cul-de-sacs.

Regulatory Standards

Encourage compatible architecture styles that maintain or compliment neighborhood character and enforce residential infill development regulations in to preserve and stabilize existing neighborhoods.

Conservation Areas

New development should be designed to preserve existing undeveloped greenspace, especially in areas identified on the "Additional Areas for Consideration" map. Potential development strategies include clustered development, conservation communities, or conservation villages and hamlets.

Memorandum

Date: September 17, 2024

Subject: Trip Generation Study for Proposed Townhomes Development

2724 Kelly Lake Road, DeKalb County, Georgia

The trip generation was calculated for a proposed townhomes development in DeKalb County. The site is located along the east side of LaFortune Road, north of Kelly Lake Road, as shown in Figure 1. The project will consist of 12 attached residential townhomes with one full-movement vehicular access proposed on LaFortune Road. The site plan is presented in Figure 2.

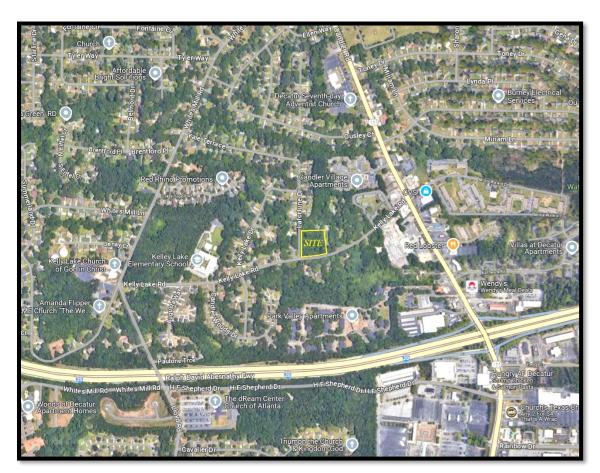

Figure 1 – Site Location Map

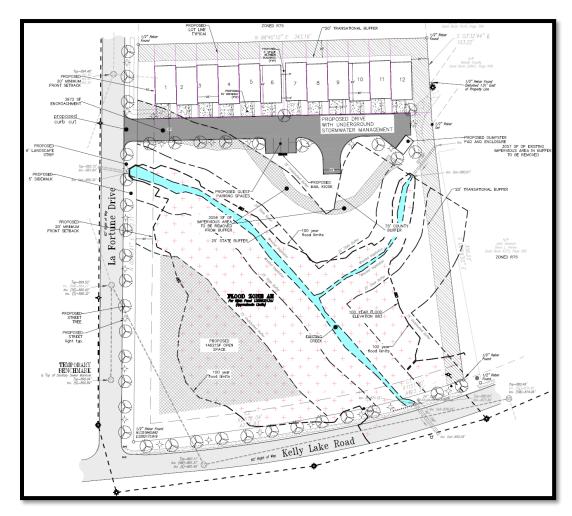

Figure 2 – Proposed Townhomes Site Plan

The volume of traffic that will be generated by the townhomes was calculated using the rates in the Institute of Transportation Engineers (ITE) *Trip Generation Manual*, 11th Edition (the current edition). ITE Land Use 215 – Single Family Attached Housing was chosen as representative of the project. The average trip rates were used instead of the equations due to the small number of units (twelve units are proposed; the average number of units for these developments is 120 to 136 units). This yielded conservatively higher numbers of trips than the equations. The trip generation for the proposed townhomes is presented in Table 1.

Table 1 – Proposed Townhomes Development Trip Generation

Land Use	ITE Code	Size	A.M. Peak Hour			P.M. Peak Hour			24-Hour		
			In	Out	Total	In	Out	Total	In	Out	Total
Townhomes	215	12 homes	1	5	6	4	3	7	43	43	86

The proposed townhomes development will generate 6 trips in the a.m. peak hour, 7 trips in the p.m. peak hour, and 86 trips in a 24-hour period.

The trip distribution was developed for the project. This determines the percentage of the project's trips that will travel to and from each direction on the public roadways. The trip distribution for the townhomes takes into consideration the locations of employment centers, retail developments, and schools in the vicinity and the major routes of travel in the area, most notably Candler Road (SR 155) and its interchange with Interstate 20. The project's trips were assigned to the full-movement project access on LaFortune Drive and the intersection of Kelly Lake Road at LaFortune Drive. Figure 3 presents the trip distribution percentages and the project trips that will be generated by the townhomes.
