Application for Certificate of Appropriateness

Date submitted: _____ Date Received: _____

Address of Subject Property: 1320 Harvard Road Atlanta, GA 30306

Applicant: David Price E-Mail: dave@priceresidentialdesign.com

Applicant Mailing Address: 1595 Nottingham Way NE Atlanta, GA 30309

Applicant Phone: 404-245-4244

Applicant's relationship to the owner: Owner Architect Contractor/Builder Designer Other

Owner(s): Amy Birnbaum Email: birny.birny@gmail.com

Owner(s): Adam Klein Email: adammklein@hotmail.com

Owner(s) Mailing Address: 1320 Harvard Road Atlanta, GA 30306

Owner(s) Telephone Number: 404-291-6911

Approximate date of construction of the primary structure on the property and any other structures affected by this project: 1922

Accessory Structure was likely after 1922 but before 1946

Nature of work (check all that apply):

New construction	<input type="checkbox"/>	New Accessory Building	<input type="checkbox"/>	Other Building Changes	<input checked="" type="checkbox"/>
Demolition	<input type="checkbox"/>	Landscaping	<input type="checkbox"/>	Other Environmental Changes	<input type="checkbox"/>
Addition	<input type="checkbox"/>	Fence/Wall	<input type="checkbox"/>	Other	<input type="checkbox"/>
Moving a Building	<input type="checkbox"/>	Sign Installation	<input type="checkbox"/>		

Description of Work:

Renovate existing accessory building with ADU above garage/crawlspace. The existing dilapidated screened porch will be removed and replaced further to rear on the same side. Many structural deficiencies will be repaired that will require replacing the existing lap siding with Hardiplank siding. All windows and doors will be replaced with some slightly modified in size or location. Garage door will be replaced. Fiberglass shingles will be replaced. Other than its porch, the accessory structure itself will remain the same size / shape. No work to main house.

This form must be completed in its entirety and be accompanied by supporting documents, such as plans, list of materials, color samples, photographs, etc. All documents should be in PDF format, except for photographs, which may be in JPEG format. Email the application and supporting material to plansustain@dekalbcountyga.gov and pvjennings@dekalbcountyga.gov. An incomplete application will not be accepted.

Signature of Applicant: 

DEPARTMENT OF PLANNING & SUSTAINABILITY

Authorization of a Second Party to Apply for a Certificate of Appropriateness

This form is required if the individual making the request is **not** the owner of the property.

I/ We: Amy Birnbaum and Adam Klein

being owner(s) of the property at: 1320 Harvard Road

hereby delegate authority to: David Price

to file an application for a certificate of appropriateness in my/our behalf.

Signature of Owner(s):

Date: 3/22/25

Please review the following information

Approval of this Certificate of Appropriateness does not release the recipient from compliance with all other pertinent county, state, and federal regulations.

Before making any changes to your approved plans, contact the preservation planner (404/371- 2155). Some changes may fall within the scope of the existing approval, but others will require review by the preservation commission. If work is performed which is not in accordance with your certificate, a Stop Work Order may be issued.

If your project requires that the county issue a Certificate of Occupancy at the end of construction, an inspection may be made to verify that the work has been completed in accord with the Certificate of Appropriateness. If the work as completed is not the same as that approved in the Certificate of Appropriateness you will not receive a Certificate of Occupancy. You may also be subject to other penalties including fines and/or required demolition of the non-conforming work.

If you do not commence construction within twelve months of the date of approval, your Certificate of Appropriateness will become void and you will need to apply for a new certificate if you still intend to do the work.

RE: Structural Assessment for 1320 Harvard Road, Atlanta, GA 30306

Date of site visit: 02/12/18

Se#18063

The purpose of this letter is to provide a structural narrative and options for the proposed renovation of the standalone garage with carriage house above along with a covered porch on the side. The current construction consists of a concrete slab-on-grade, 8" brick foundation walls, 2x4 @ 20" stud wall with no sheathing. The floor framing over the garage consists of 2x12 @ 20" O.C., spanning 19'-6" "left-to-right", if facing the garage. An addition was added behind the garage with 2x8 @ 16" floor joists spanning 12'-0" "front-to-back". The roof framing we were able to see was 2x4 rafters and 1x roof sheathing. Overall, the garage is in poor condition with several major structural deficiencies. The brick foundation walls are cracked on several faces of the exterior wall which indicate settlement and movement. The wood walls have water and termite damage. The east wall is at risk of movement & settlement due to a failing retaining wall along the property line.

My understanding is that the building is being evaluated for the possibility of restoring the structure. The proposed plan would keep as much of the existing structure as possible and correct structural deficiencies. Any area of framing that is being repaired must be brought up to current code. Areas without known damage (such as the roof) do not need to be brought up to current code as long as they are not modified. Below is a narrative of the structural modifications required to complete this rehabilitation:

1. Rear "addition" foundation wall (approximately 12 feet long) at the north\east side needs to be replaced. A new footing at the rear corner is required, which will have to be excavated down approximately 3 feet to firm soil, or supported on a helical pier.
2. The floor joists over the garage are over-spanned and need to be stiffened by sistering new joists to the existing joists. New (2) 2x12 should be added to each existing joist to span the garage.
3. Rebuild exterior garage walls with 2x4 @ 16" with 7/16" OSB sheathing to replace existing wall with termite damage and no lateral bracing. This will require shoring support for the existing floor and walls above.
4. Provide new footings at front corners of garage. Add new portal frame with LVL header for lateral bracing per code.
5. Add approximately 4 concrete footings under "left" side brick foundation wall @ 48", cut in to slab and underpin wall.

6. Add approximately 5 to 6 helical piers below brick stem wall @ 48" on "right" side of garage along eastern property line.
7. Add ± 45 linear feet of new retaining wall, approximately 4 feet tall, along property line to replace existing failing granite wall.
8. Tear down and rebuild of side porch, which does not meet code as-is and has structural deficiencies. New framing to meet IRC 2012 GA deck amendments with appropriate connections to garage and diagonal bracing at columns.
9. Recommend re-pouring existing garage slab which is currently cracked, unlevel, and deteriorated.
10. The roof framing does not meet current code but can remain "grandfathered" if untouched. No damage observed.

It is our opinion that rehabilitation is possible with the structural corrections outline above; however the cost may be prohibitive and not financially feasible. If you have any questions, or if I can be of any assistance, please call me. Stability Engineering can provide full repair plans for permit if desired.

Sincerely,
Stability Engineering, Inc.

Bob Englehart

Front garage wall. New footings and portal framed header required.

Left wall settlement crack, new underpinning footings required.

Left foundation wall and over-spanned 2x12 joists

Rear addition corner settlement to be re-built with new footing and wall

Addition side wall to be replaced

Damaged wall framing to be replaced

Side porch to be re-built

SURVEY NOTES

- STORM SEWER, SANITARY SEWER AND OTHER BURIED UTILITIES MAY HAVE BEEN PAVED OR COVERED OVER. THE LOCATION OF UNDERGROUND UTILITIES AS SHOWN HEREON ARE BASED ON ABOVE GROUND STRUCTURES AND RECORD DRAWINGS PROVIDED TO THE SURVEYOR. LOCATIONS OF UNDERGROUND UTILITIES MAY VARY FROM LOCATIONS SHOWN HEREON. ADDITIONAL BURIED UTILITIES MAY BE ENCOUNTERED. NO EXCAVATIONS WERE MADE DURING THE PROGRESS OF THIS SURVEY TO LOCATE BURIED UTILITIES. BEFORE EXCAVATIONS ARE BEGUN, THE FOLLOWING OFFICES SHOULD BE CONTACTED FOR VERIFICATION OF UTILITY TYPE AND FOR FIELD LOCATIONS.
