Planning Department Staff Analysis

Juliana
Njoku

Director

N7. Case No: A-26-1248233

Parcel ID(s): 18 065 11 054

Commission District 04 | Super District 06

Applicant: Gail R. Tassell

Owner: Kimberly V. Tassell and David Tassell

Project Name: Existing Residence Renovation and Accessory Structure

Location: 862 Tanner Drive, Scottdale, GA 30079

Requests:

1. Reduce the principal residence front setback from 35 feet to 32 feet and the side setback from 7.5 feet to three (3) feet to allow renovation and expansion of the existing residence.
2. Reduce the accessory-structure rear setback from 10 feet to two feet and side setback from 7.5 feet to five (5) feet to retain an existing 16-by-18-foot shed.

Staff Recommendation: Approval with conditions for the principal residence; denial of the accessory-structure relief

Conditions:

1. The following information about this variance shall be noted on any site plan prepared for the subject property: case number, approval date, type of variance, and condition(s) of approval.
2. The approved principal-residence relief shall be limited to a front setback of no less than 32 feet and an interior side setback of no less than three (3) feet, in substantial conformity with a dimensioned survey and renovation plans approved for permitting.
3. This approval does not authorize the existing shed at the requested two-foot rear and five-foot side setbacks. The accessory structure shall be relocated, removed, or otherwise resolved through a separate lawful approval before issuance of permits dependent on zoning compliance.
4. No conversion of the shed to an accessory dwelling unit, habitable space, or space with plumbing is authorized by this decision. Any such proposal must independently satisfy all use, lot-size, parking, building, utility, and permitting requirements.

STAFF FINDINGS:

The subject property contains approximately 0.17 acre and is developed with a residence described as constructed in the 1940s. The existing house is represented as already encroaching into current front and side setbacks. The applicant proposes renovations and an addition using reduced front and side setbacks.

A separate letter requests rear and side setback relief to retain a 16-by-18-foot shed that has already been constructed. The applicant states that a mature tree limits a conforming accessory-structure location and that existing vegetation and fencing screen the shed. The packet does not include a sealed survey or arborist evidence sufficient to verify those assertions.

1. There is an extraordinary or exceptional physical condition(s) pertaining to the particular piece of property (such as, but not limited to, lot size, lot shape, specimen tree(s), steep slope(s), or preservation of historic characteristics of the property), which was not created by the current owner, previous owner, or applicant; by reason of a clearly demonstrable condition(s), the strict application of the requirements of this chapter would deprive the property owner of rights and privileges enjoyed by other property owners in the same zoning district, as distinguished from a special privilege or convenience sought by the property owner.

The longstanding placement of the 1940s residence may be a non-self-created physical condition supporting limited principal-house relief. A mature tree may also be a physical condition, but the shed's nonconforming placement was created through construction by the current owner or applicant unless the record proves otherwise.

2. The requested variance does not go beyond the minimum necessary to afford relief, and does not constitute a grant of special privilege inconsistent with the limitations upon other properties in the zoning district in which the subject property is located.

A three-foot front reduction for the principal house may be limited if tied to the existing structure and a specific renovation plan. The accessory-structure request reduces the rear setback by eighty percent, and the present record does not establish why a smaller shed, relocation, or conforming alternative is infeasible.

3. The grant of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the zoning district in which the subject property is located.

Renovation of an existing residence may benefit the property without material neighborhood impact if the addition remains compatible. A shed two feet from a rear lot line may create drainage, fire-separation, maintenance, or privacy impacts that cannot be evaluated without a survey and plans.

4. The literal interpretation and strict application of the applicable provisions or requirements of this chapter would cause undue and unnecessary hardship.

The existing house placement may make full compliance impracticable for a reasonable renovation. By contrast, constructing the shed before obtaining relief creates a self-imposed condition, and the submitted narrative alone does not establish undue hardship for its retention.

5. The requested variance would be consistent with the spirit and purpose of this Chapter and the DeKalb County Comprehensive Plan text.

Preservation and improvement of an older residence can align with neighborhood and Comprehensive Plan goals. Protection of a mature tree may also support ordinance purposes, but those objectives do not by themselves authorize retention of an unpermitted encroachment or conversion to an ADU.

FINAL STAFF ANALYSIS:

The record supports a preliminary distinction between the longstanding principal residence and the more recent accessory structure. Limited relief for the existing house may be justified if a sealed survey and renovation plan confirm the requested dimensions.

The accessory-structure hardship is not established on the present record. The structure was already built, the claimed tree constraint is undocumented, and possible ADU conversion raises separate standards beyond the noticed setback request.

Therefore, staff preliminarily recommends partial approval with conditions for the principal-residence setbacks and denial of the accessory-structure setbacks on the present record.

Staff Recommendation: approval with conditions for the principal residence; denial of the accessory-structure relief on the present record

Conditions:

1. The following information about this variance shall be noted on any site plan prepared for the subject property: case number, approval date, type of variance, and condition(s) of approval.
2. The approved principal-residence relief shall be limited to a front setback of no less than 32 feet and an interior side setback of no less than three feet, in substantial conformity with a dimensioned survey and renovation plans approved for permitting.
3. This approval does not authorize the existing shed at the requested two-foot rear and five-foot side setbacks. The accessory structure shall be relocated, removed, or otherwise resolved through a separate lawful approval before issuance of permits dependent on zoning compliance.
4. No conversion of the shed to an accessory dwelling unit, habitable space, or space with plumbing is authorized by this decision. Any such proposal must independently satisfy all use, lot-size, parking, building, utility, and permitting requirements.

Subject: Variance Request for Primary House Setback

Property Address: 862 Tanner Drive, Chamblee, GA 30341

Dear Members of the Zoning Board of Appeals,

I respectfully submit this request to the DeKalb County Zoning Board of Appeals for a set back variance for the property located at 862 Tanner Drive, Scottdale GA 30379 in unincorporated DeKalb County. This request seeks relief from the accessory structure setback requirements established under the DeKalb County Zoning Ordinance, specifically Section [e.g., 27-2.2 or 27-7.6, governing side and/or rear yard setbacks.

Request:

I am requesting a variance to reduce the front yard setback from 35 feet to 32 feet and the side yard set back from 7.5 to 3 feet. I am looking to renovate my house. The house was built in 1940's and is currently over the setbacks and looking to reduce the set setbacks in order to do the renovations and additions.

Justification based on DeKalb County Variance Criteria:

1. **Physical Conditions:** The subject property is over 80 years old. It was built to the standards in the 1940's and I am looking to update the house to accodate modern day standards These conditions were not created by the current owner or the previous owner therefore due to these clearly demonstrable condition(s), the strict application of the requirements of this chapter would deprive the property owner of rights and privileges enjoyed by other property owners in the same zoning district, as distinguished from a special privilege or convenience sought by the property owner.
2. **Hardship:** Enforcing the literal interpretation of the current setbacks would cause an undue and unnecessary hardship since the house was built in the 1940's. This is what is was and in order to renovate my house I need the setbacks reduced.
3. **Minimum Relief:** The house is existing and is not creating undo hardship on my neighbors. This variance request is the absolute minimum necessary to allow renovations The grant of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the zoning district in which the subject property is located.
4. **Public Welfare:** Granting this variance will not be materially detrimental to the public welfare or injurious to neighboring properties. The neighboring properties have similar renovations which will also enhance the neighborhood.

5. **Spirit and Purpose:** The requested variance respects the intent of the zoning ordinance by providing limited flexibility while respecting and preserving the house and stock. improvements to the house will add to the enhancement of the neighborhood.

Thank you for your time, consideration, and dedication to DeKalb County. I look forward to the opportunity to discuss this request with the Board.

Sincerely,
Gail R. Tassell

DeKalb County Zoning Board of Appeals

Department of Planning & Sustainability
178 Sams Street
Decatur, GA 30033

Subject: Variance Request for Accessory Structure (Shed) Setback

Property Address: 862 Tanner Drive, Chamblee, GA 30341

Dear Members of the Zoning Board of Appeals,

I respectfully submit this request to the DeKalb County Zoning Board of Appeals for a set back variance for the property located at 862 Tanner Drive, Scottdale GA 30379 in unincorporated DeKalb County. This request seeks relief from the accessory structure setback requirements established under the DeKalb County Zoning Ordinance, specifically Section [e.g., 27-2.2 or 27-7.6, governing side and/or rear yard setbacks.

Request:

I am requesting a variance to reduce the rear 10-foot setback to 2 feet and the side yard set back from 7.5 to 5 feet. This reduction will allow me to maintain the 16 foot by 18 foot shed that has been constructed on the property to be used for storage or to convert the shed to an ADU for additional living space.

Justification based on DeKalb County Variance Criteria:

1. **Physical Conditions:** The subject property features a unique, immovable physical condition: a massive, heritage tree that is approximately 100 years old. The critical root zone and canopy of this tree span the exact area where a shed/ADU would have to be located to satisfy the required setbacks for accessory structures. The extraordinary or exceptional physical condition(s) pertaining to the property is the small lot size and the specimen tree. These conditions were not created by the current owner or the previous owner therefore due to these clearly demonstrable condition(s), the strict application of the requirements of this chapter would deprive the property owner of rights and privileges enjoyed by other property owners in the same zoning district, as distinguished from a special privilege or convenience sought by the property owner. For example, both neighboring properties to the applicant's property have sheds in the rear yards.
2. **Hardship:** Enforcing the literal interpretation and strict application of the side and rear setbacks would cause an undue and unnecessary hardship. Building the shed/ADU in compliance with the setbacks would have required the applicant to destroy or irreversibly damaging the root system of this century-old tree, which is a significant environmental and aesthetic asset to applicant's property. The requested variance does not go beyond the minimum necessary to afford relief and does not constitute a grant of special privilege inconsistent with the limitations upon other properties in the zoning district in which the subject property is located.
3. **Minimum Relief:** This variance request is the absolute minimum necessary to allow for reasonable location of the shed/ADU while entirely avoiding the tree's protected root zone. The grant of the variance will not be materially detrimental to the public welfare or injurious

to the property or improvements in the zoning district in which the subject property is located. The shed is shielded from the neighbors view by vegetation and the existing fence.

4. **Public Welfare:** Granting this variance will not be materially detrimental to the public welfare or injurious to neighboring properties. The shed/ADU will be properly screened by existing vegetation, the fence, and the mature tree. The neighboring properties have similar sized trees that enhance the neighborhood.
5. **Spirit and Purpose:** The requested variance respects the intent of the zoning ordinance by providing limited flexibility while preserving a significant, mature tree, which aligns with the county's broader environmental and tree-protection goals.

Thank you for your time, consideration, and dedication to DeKalb County. I look forward to the opportunity to discuss this request with the Board.

Sincerely,
Gail R. Tassell

DeKalb County Zoning Board of Appeals

RE: Support for Variance Request – 862 Tanner Drive

Dear Members of the Board,

My name is **Heather Christopher**, and I reside at **866 Tanner Drive** to the right of **862 Tanner Drive** in Scottdale GA.

I am writing to express my support for the variances request associated with the proposed renovations to the property at 862 Tanner Drive as well as the Shed and/or Accessory Dwelling Unit at this property.

The owners have shared their plans with me, and I believe the project will be a positive improvement for our neighborhood. The design is attractive, appropriately scaled, and consistent with the character of surrounding homes. The improvements will enhance the appearance of the property and contribute positively to the community.

The requested variance will not adversely affect neighboring properties, traffic, drainage, or property values. On the contrary, I believe it will improve the neighborhood.

For these reasons, I respectfully ask the Zoning Board of Appeals to approve the requested variances.

Thank you for your time and consideration.

Sincerely,

Heather Christopher
