

Woodacres Water Main Replacement Project Update: July 30, 2024

Good morning, Resident!

Paving will take place today on Malabar Drive between Wentworth Drive and Woodacres and on Wentworth Drive between Malabar Drive and Jordan Terrace.

We've completed pressure testing for Phase I and will be flushing lines beginning tomorrow and will continue to do so for the next three days. This means you may see water running down the street into the storm drain if you are on any of the Phase I streets: Battle Drive, Jordan terrace, Malabar Drive, Wentworth Drive and the southern part of Woodacres Road.

Dover Hill Place, which is part of Phase II, will take three to four weeks to complete pipe installation.
